Who

Leaf Software Solutions has spent the last 27 years in Indiana, accelerating commercial growth for our clients. We develop mission critical software solutions that solve complex business challenges. Typically our clients come to us when they are looking to expand and grow their business exponentially or after they have exhausted their search for off-the-shelf technology solutions. Leaf brings a unique blend of talented business and technology resources to every project. We strive to first understand the opportunities and challenges our clients are facing, and then apply the correct technology solutions. Because we focus on the business need first, we can design solutions which scale with our clients. We are architects and builders of software products that intersect across cloud, mobile, and a dynamic user experience.

What

Our clients expect solutions that are innovative and transformational. To ensure success, Leaf has evolved its approach to meet the needs of each project. The Leaf Solutions Framework process allows our project teams to experiment and take risks, while avoiding failure by working together to solve issues when they arise. Built on a solid foundation of trust, the partnership with our clients brings a fresh perspective while solving multifaceted customer needs. Technology solutions require teams to be nimble and agile as requirements are constantly evolving. Leaf has the experience and tools required to manage the risks associated with these projects, while providing complete transparency of the process throughout the engagement.

Why

Leaf is built on four guiding principles of Fairness, Kindness, Effectiveness, and Significance. These principles reflect how we select our projects, team members, and ultimately deliver solutions for our clients. Since our founding, Leaf has built a productive and comfortable work place for its employees. Leaf has also contributed in a significant manner to the community in which we live and work. We have been recognized by the Indiana Chamber of Commerce as one of the Best Places to work in Indiana since 2012. Leaf contributes annually to the United Way, Kids Against Hunger, and the TechPoint Foundation. If you have a complex software technology project which needs to be completed on time and within budget, please contact Leaf Software Solutions for a free initial consultation.
