

Step Into the Cloud.

Step Into the Cloud is a standardised process to help customers understand and design their Azure infrastructure, providing them with the assistance they need along the way. Step Into the Cloud is an important milestone for Azure enablement, and maps to the Ready phase of the Microsoft Cloud Adoption Framework.

WHY SHOULD YOU CARE?

Governance, security, cloud spend and lack of skills are the key challenges for companies that have adopted the cloud. Tackle these challenges from the start with Step Into the Cloud.

WHAT WILL IT BRING YOU?

Through dedicated sessions, we will address the key components of a scalable and proven landing zone.

- Governance
- Security
- Hybrid identities
- Connectivity
- Monitoring
- Automation

WHEN SHOULD YOU LEVERAGE STEP INTO THE CLOUD?

When you want to experiment or deploy your first production workload in the cloud and want to make sure that your initial efforts will not have to be duplicated. You also want to make sure that you can sustain the growth linked to the adoption of even more workloads.

WHAT DO YOU GET?

This engagement is composed of several work packages.

- **Azure Discovery Workshop** (0.5 days) – delivered by one of the ACC experts
- **6 topic workshops** (0.5 days each) – for each of the topics, the workshop will be delivered in three parts:
 - Presentation of the topic and its Azure implementation
 - Presentation of the prescriptive guidance from the Bechtle SITC blueprint
 - Discussion and documentation of the associated design decisions, variation from the recommendations and associated justification
