

We make digital products and experiences that have a lasting impact

TechFabric helps progress digital transformation by building robust software applications that scale extremely well on demand, yet prove fault-tolerant, and secure. We partner with your existing IT teams to deliver innovative custom software, so your team can focus on what truly matters.

CUSTOM WEB, MOBILE & CLOUD-BASED SOFTWARE APPLICATIONS

Through the power of Microsoft Azure, using Microservices and API-led connectivity approach, we develop solutions that empower your business and achieve tangible results: increased revenues, productivity, and customer loyalty.

TechFabric architects devise efficient application development strategies to automate business processes and deliver amazing user experiences through cutting edge Microsoft technologies and best practices.

Customer Experience

- Focusing on the customer, we design your customer's journey, optimizing every touchpoint for convenience and delight
- We synthesize research, mapping data to the customer journey
- We design and roadmap multi-channel solutions throughout the journey

Digital Products

- Websites, apps, interfaces, AI and more.
- We are a full-service product strategy, design and development partner
- Multidiscipline designers create solutions, using agile, iterative processes
- As products enter the market, we use real-time data to develop and deploy new features

Data Science

- We engineer secure data architectures
- Then we build powerful, real-time and dynamic visualization tools
- Next, we develop actionable insights and help clients identify and tackle the problems they need to solve
- We use AI and Machine Learning to create intelligent customer experiences.

“ Tech Fabric revolutionized Automotive Auctions Platform

“Leveraging cloud-native technologies of Microsoft Azure, TechFabric built our new automotive auctions platform used by many credit unions across United States to auctions vehicles to their members. The new platform is super fast, scalable and provides amazing user experience to our customers delivering outstanding ROI to our bottom line.”

- Jerry Neemann, CEO, CUAuctions.com

TechFabric's Cloud Strategy

Tech Fabric builds new Auto Refinance Platform on Microsoft Azure

- Leveraging the power of Azure, Tech Fabric builds new Refi Platform used by Loan Consultants
- Implemented Robotic Process Automation using Power Automate, Functions, Logic Apps, PowerApps etc...
- Setup robust and secure infrastructure using Azure networking and virtual networks
- Created scalable architecture using Service Fabric, App Services, .NET Core, C#, Typescript etc.,
- We cultivate expertise in every stage of product creation, resulting in extraordinary digital experiences.

Secure Microservices Architecture

“One thing about the TechFabric team that stands out is their dedication and commitment. They’ve always been available when we needed them, and they provide right solutions to problems. Honestly, I feel like they’re an extension of our team, helping us fill the gaps from product management to design and development of solutions using Azure.”

- Mark Lindley, Managing Director of IT and Systems,
