

Dynamics 365 ERP: Dynamics GP 2 Hour Assessment

Let our specialists at SHEA Global determine what the best approach to a cloud strategy is for you as an organization, currently running Microsoft Dynamics GP (Great Plains).

Overview

We will review your current implementation status, licensing, and goals for considering a cloud strategy. With over 25 years of experience in various Microsoft products, and as Microsoft Dynamics Great Plains implementation specialists, we can help you determine the most appropriate next steps for your Dynamics GP implementation.

Agenda

We will discuss the following topics:

- User counts and licensing
- Customizations
- Integrations
- Reporting
- Modules in use
- Accessibility and security
- Key business processes and future goals
- Reasons you are considering a move to the cloud in some way

Our specialists will then consider current Microsoft licensing and transition offers, moving GP to the cloud, migration to an alternate suitable Dynamics 365 cloud ERP solution, and any other factors you may bring up during the assessment.

Deliverables

Our recommendation will be delivered in the form of a slide presentation which can be used internally by your organization following this engagement. We will include potential pricing, timelines, and pros and cons of each approach considered.

Cost: \$0 USD
