# Managed DaaS on Azure

Ever-evolving end-user requirements of 'anytime, anywhere, any device' secure access to data and applications require enterprises to leverage the power of Cloud for ease of convenience in redesigning the new End-User Computing (EUC) architecture. Cloud provides a significantly lower total cost of ownership for virtual desktops while allowing enterprises to deliver the same experience across devices at the location of end-users convenience.

As a recognized specialist in Cloud and Virtualization technologies, Anunta's Managed DaaS on Azure – provides significant value over standard DaaS solutions by delivering an Azure-based Cloud desktop, that includes end to end management (build, configure, manage, store, execute functions) and deliver end-users' with ready to use desktops.
## Components of Managed DaaS on Azure Cloud

**Design & Consulting**

**+**

**Onboarding and Implementation**

Configuration, Migration and User Acceptance Testing.

**+**

**End-to-End Support**

Smart Monitoring and Help Desk.

## Features

- Active Directory authentication.
- Delivers Remote Desktop applications.
- Provides instant access to remotely stored files on OneDrive or file server.
- Common billing across Business Units.
- Provides single-point accountability for DaaS on Azure management.
- Optimizes expenditure on Azure with automated workload scheduling.

## Benefits

- Built on highly scalable and robust platform using Azure with high security and simplified management.
- Zero upfront cost as it is available on 'pay as you go' model.
- Significant savings on maintaining highly skilled in-house resources, translating to reduced TCO.
- Seamless upgrade to Windows Virtual Desktop (WVD); including, multi-user WVD only available on Azure.
- Robust security policies enable you to implement BYOD policies that allow end-users to access data and applications through devices of their choice without compromising on security and compliance.
- Compatible with O365 with single license from Microsoft.
- Centralized management aids rapid scaling up and down.
- End-to-end implementation and integration with existing applications and peripherals.
- Fully managed desktop with comprehensive Help Desk and Single point of accountability for all end-user performance issues.
- Easy backup and DR solution available at low additional cost.
