Data Warehouse Migration, Analytics & Support

Accelerate the journey to the cloud of your data landscape by 60%

On-premises Data Warehouse, BI and analytics ecosystems are costly and incapable of solving complex, data intensive problems. Enterprises want to cloudify data landscapes, embrace limitless scalability at a reduced TCO.

Hexaware's Solution

Enterprises want to adopt cloud services for their data landscape rapidly at scale. We at Hexaware automate cloud migration process through our **AMAZE™ for Data & AI** platform that accelerates migration and brings cost effectiveness.

✓ 50% TCO savings

✓ 60% faster time to market

✓ 20% savings on support costs

✓ 10x faster data to insights time

Accelerated

- Automated data, pipelines and analytics migration

- Re-platform on-premises data landscape to cloud within 3 to 4 months

- Accelerated time to market by 60%

Smart

- Repeatable migration framework

- Delivers consistent quality and savings

- Secured data migration

Cost Effective

- 50% - 60% savings in your data landscape TCO

- No external licensed products used for migration

- A proprietary platform that saves significant migration costs

"Hexaware defined a modern data architecture based on the Azure platform and delivered integrated data insights. The new ecosystem reduced our Total Cost of Ownership by over 50%."

- Ian Featherstone, CIO, ENVA Group

# How AMAZE™ for Data & AI works, to achieve business benefits

Data Warehouse Migration

- Migrates on-premises DW appliances to Azure SQL DW / Synapse
- Saves data store TCO by 40%

Data Pipelines Migration

- Migrates on-premises data pipelines to SSIS / ADF
- Saves ETL costs by 10%

Data Analytics Migration

- Migrates data reporting layer to SSRS / Power BI
- Reduce BI licenses costs by 2/3rd

Our promise to you

We re-platform your on-premises data landscape to cloud within 3 to 4 months timeframe

An offer to get you started

- Get your on-premises Data landscape complexity assessed by us
- Gauge your readiness for Azure migration
- Pricing estimate of Azure services for your landscape

Box 24: Tangible Benefits / Desired Outcomes

- 50% - 60% reduction in data landscape TCO on Azure
- Reduce migration costs by 60% - 65%
- Reduce efforts in migration process by over 60%

Why Hexaware?

We can automate the migration of your on-premises data warehouse, BI and analytics ecosystem to Azure through our accelerated, smart and cost-effective platform, AMAZE™ for Data & AI that accelerate your journey to the cloud by 60% without any disruption to the business.
