

Hybrid Cloud Adoption Strategy Workshop

Our half day workshops are designed to help you understand your business priorities and uncover the factors that will influence your hybrid cloud adoption strategy.

Why do I need a Hybrid Cloud Adoption Strategy?

Cloud-based transformation projects have high expectations and visibility, but too many initiatives fall short due to a lack of alignment between IT and the wider business.

Organisations that embark on cloud computing initiatives without a clear strategy struggle to realise the full benefits. We can help.

Why should I book a 1/2 day workshop?

The key purpose of these sessions is for us to help you pave the way for a successful cloud journey by facilitating cross-team collaboration and decision-making.

Each workshop can be delivered on your premises and will be led by one of our cloud strategists.

Scope

Our Hybrid Cloud Adoption Strategy Workshop will provide you with:

- A common view of cloud concepts, benefits and adoption fears,
- A clear understanding of Cloud governance requirements,
- An alignment of Cloud IT requirements to your strategic business objectives,
- Best practice in respect to data centres, IT infrastructure, applications and service,
- An understanding of cloud solutions relevant to your business,
- Priority candidates for cloud migration and the associated benefits of expediting.

How it works

1. Contact your account manager to schedule,
2. Complete our preparation questionnaire,
3. Provide us with an inventory of IT systems and logical/physical systems in use,
4. Six Degrees confirm suitability, date and send you an agenda.

Key Outputs

Following a workshop you will benefit from:

- A solid and comprehensive understanding of the current cloud landscape,
- A clear rationale for your cloud strategy,
- An initial view on your potential workloads ready for our cloud assessment,
- A cloud maturity evaluation to show your progress as you advance through your cloud journey.
