Envision Blockchain Immersion Labs

Expedite your teams Blockchain knowledge and go-strategy

EDUCATION

Participants in the Envision Blockchain Immersion Lab will enroll in a 1/2 day training course that follows a syllabus that covers the principals of Blockchain and the Enterprise Technology that Microsoft Azure provides to support Blockchain Technology.

» **Understanding Blockchain Technologies (1 Hours)**
Topics include: Types of Blockchains, Immutabiity of Data, Smart Contracts, and Consensus Algorithms.

» **Blockchain Deployment and Demo (2 Hours)**
Topics include: Microsoft Azure Resources Involved, Understanding the Deployment Process, Deploying Smart Contracts to the Blockchain Workbench and Managing Azure Active Directory Users.

» **Use Case Discussion (1 Hour)**
Highlevel discussion of Business Processes and where and how Blockchain Technology applies.

This course is intended for: CIOs, CTOs, IT Directors and Managers, Enterprise Architects, Business Analysts, Administrators, and Developers.

IMMERSION

The Envision Blockchain Immersion Lab provides a unique hands-on experience not only learn about Blockchain Tecnology, but also deploy their own private Blockchain network and implement Smart Contracts to simulate various use cases.

Subject Mater Expert Led Discussions

Led by Subject Matter Experts in Blockchain Technology to help facilitate forward thinking group discussions.

Hands-On Microsoft Azure Experience

Configure and Deploy your own Microsoft Blockchain Workbench environment.

Functioning Smart Contracts and Reports

Participants will be able to take home their configured Azure Workbench environment that includes Deployed Smart Contracts and Power BI Reports.
