

# Endpoint Privilege Management

Easy for IT Support. Seamless for End-Users.

**85%** of breaches involve compromised endpoints. They are the most common entry point for threats and your largest attack surface. Companies spend billions on cyber security, yet hackers and disgruntled employees continue breaching systems. Thycotic's Privilege Manager empowers you to implement a least privilege security posture and implement application control on endpoints, minimizing risks caused by cyber attacks without disrupting end-users.

## Secure Your Largest Attack Surface

Automatically discover and remove all admin credentials from domain and non-domain endpoints

Manage Windows and Mac endpoints

## Deploy At Cloud Speed And Scale

Scale deployments elastically within our flexible architecture

Manage thousands of machines with built-in application control, real-time threat intelligence, and actionable reporting

## Implement and Enforce Least Privilege

Remove excess privileges and permanently control which accounts are members of any local group

Continuously discover endpoints, applications, and processes tied to privileged accounts

Check policies and execute application control 24/7

## Control Your Applications

Create granular application control policies

Elevate applications without requiring admin credentials or IT support

Allow people to use applications and controls they need to do their jobs, without requiring local admin rights

## Lower Your IT Support Costs

Reduce hardware issues and helpdesk tickets with more uniform endpoints

Minimize risk by only executing approved applications

Mitigate malware and insider threats from exploiting privileged local credentials on endpoints

Maintain IT productivity with ServiceNow integration and mobile application

## Privilege Manager Benefits

### Improve Security

Protect privileged accounts to tighten your attack surface and build resilience

### Unburden IT Teams

Improved security that doesn't create additional helpdesk tickets

### Meet Compliance Mandates

Avoid significant financial penalties

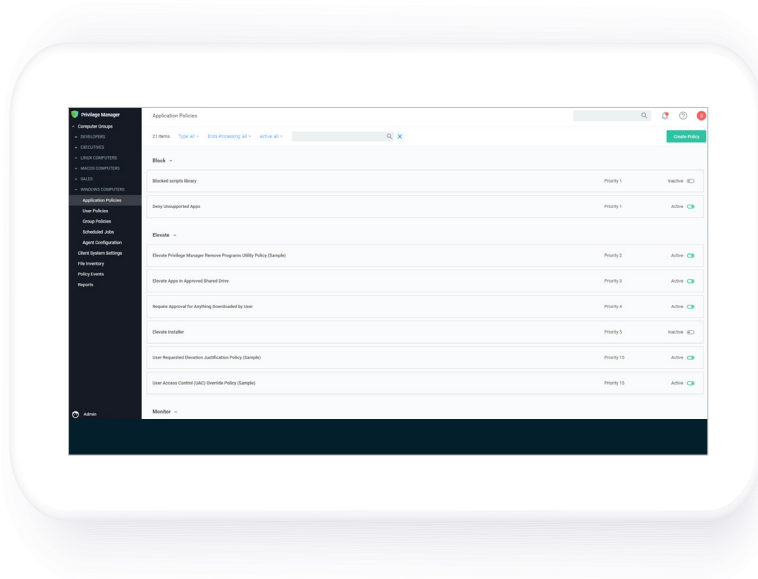

### Scale Your PAM

Deploy elastically within Thycotic's enterprise-secure architecture

# Privilege Manager empowers you to set policies based on security and business needs.

Thycotic's Privilege Manager is the most comprehensive endpoint privilege elevation and application control solution, capable of supporting enterprises and fast-growing organizations at cloud scale. Removing excess privileges from endpoints prevents malware attacks, policy-based application controls keeps people productive, and actionable reporting demonstrates progress and compliance to executives and auditors.

## All-in-one solution for least privilege management, threat intelligence, and application control

- Manage Domain and Non-Domain Endpoints
- Manage and Remove Local Admin Rights
- Define Flexible Policies
- Allow, Deny, Restrict and Elevate Applications
- Improve IT and Employee Productivity

## An Edition Designed for Every Organization, Available On-Premise or in the Cloud

The flexibility and agility to scale least privilege security controls on your own terms

### PRIVILEGE MANAGER On Premise

Intelligent PAM to meet cyber security and least privilege best practices and compliance obligations

### PRIVILEGE MANAGER Cloud

Enterprise-grade PAM-as-a-Service to support large enterprises and fast-growing organizations at scale
