

Business Process Tracker

Build cloud applications with Microsoft Power Platform

Automate complex processes, eliminate manual work, and enable fast decision-making for your business

Do you need valuable monitoring and reporting but lack critical process tracking?

The Business Process Tracker from Leaf can be configured to your needs to help you make informed decisions. Automate tasks and surface critical information with flexible reporting on key metrics and milestones.

CHALLENGES

When you lack the ability to track critical business processes and have little or no monitoring, reporting, or follow-up, your business can suffer from the lack of timely decision-making.

IDEAL SOLUTION

The tracker tool automates tasks and surfaces critical information used in decision-making. All areas of your business are monitored via 360-degree views of key metrics and milestones.

DESIRED OUTCOMES

Track, monitor, and report critical business processes to support decision-making. Automate key processes and automatically trigger follow-up protocols based on compliance/noncompliance.

Business Process Tracker

The Business Process Tracker automates complex processes, eliminates manual work, and enables fast decision-making. Track, monitor, and act on information critical to the success of your business.

1

Track business processes

Improve business process visibility through consistent, reliable data access across your business.

2

Monitor and follow up

Key business processes are monitored with deep industry knowledge and future capacity.

3

Meet your business needs

Leaf and Microsoft have the capabilities and know-how to meet your unique business needs.

Leaf Software Solutions' Business Process Tracker & Microsoft Power Platform

Leaf's Business Process Tracker automates complex processes, eliminates manual work, and enables fast decision-making. Virtually any business process can be tracked, monitored, and acted on by using the Leaf Software Solutions tracker, built using the flexible and robust Power Platform.

Track any business process

Confidently configure the Business Process Tracker to the individual needs of your organization.

Monitor with confidence

Your key business processes are monitored leveraging deep industry knowledge and future capacity expertise.

Make better decisions faster

360-degree reporting capability enables informed decision-making. The solution scales to support business needs.

Customer success: CarDon automates its testing and tracking

As a result of the coronavirus pandemic, CarDon needed to ensure the safety of its residents and associates by employing a testing, tracking, monitoring, and compliance solution. "Our focus has been on leveraging the best technology to keep our associates and residents safe. We accomplished that by partnering with Leaf."

Tracker eliminates time-consuming manual process

The Business Process Tracker, which was developed using Power Platform, eliminated manual spreadsheet entry at CarDon.

New process increases staff efficiency

Instead of sharing multiple spreadsheets and risking data loss, CarDon employees now use a single application to quickly enter business-critical data.

Reports enable better business decisions

The improved visibility allows CarDon to see where it stands with its employees and residents, while enabling informed business decision-making.

Channel partner success: Leaf Software Solutions and Power Platform

As a Microsoft Gold partner, Leaf leverages the entire suite of Microsoft 365 business applications to deploy and scale operations for midmarket businesses. Organizations partner with Leaf to architect, secure, and manage their mission-critical business applications.

Digital transformation with Power Platform

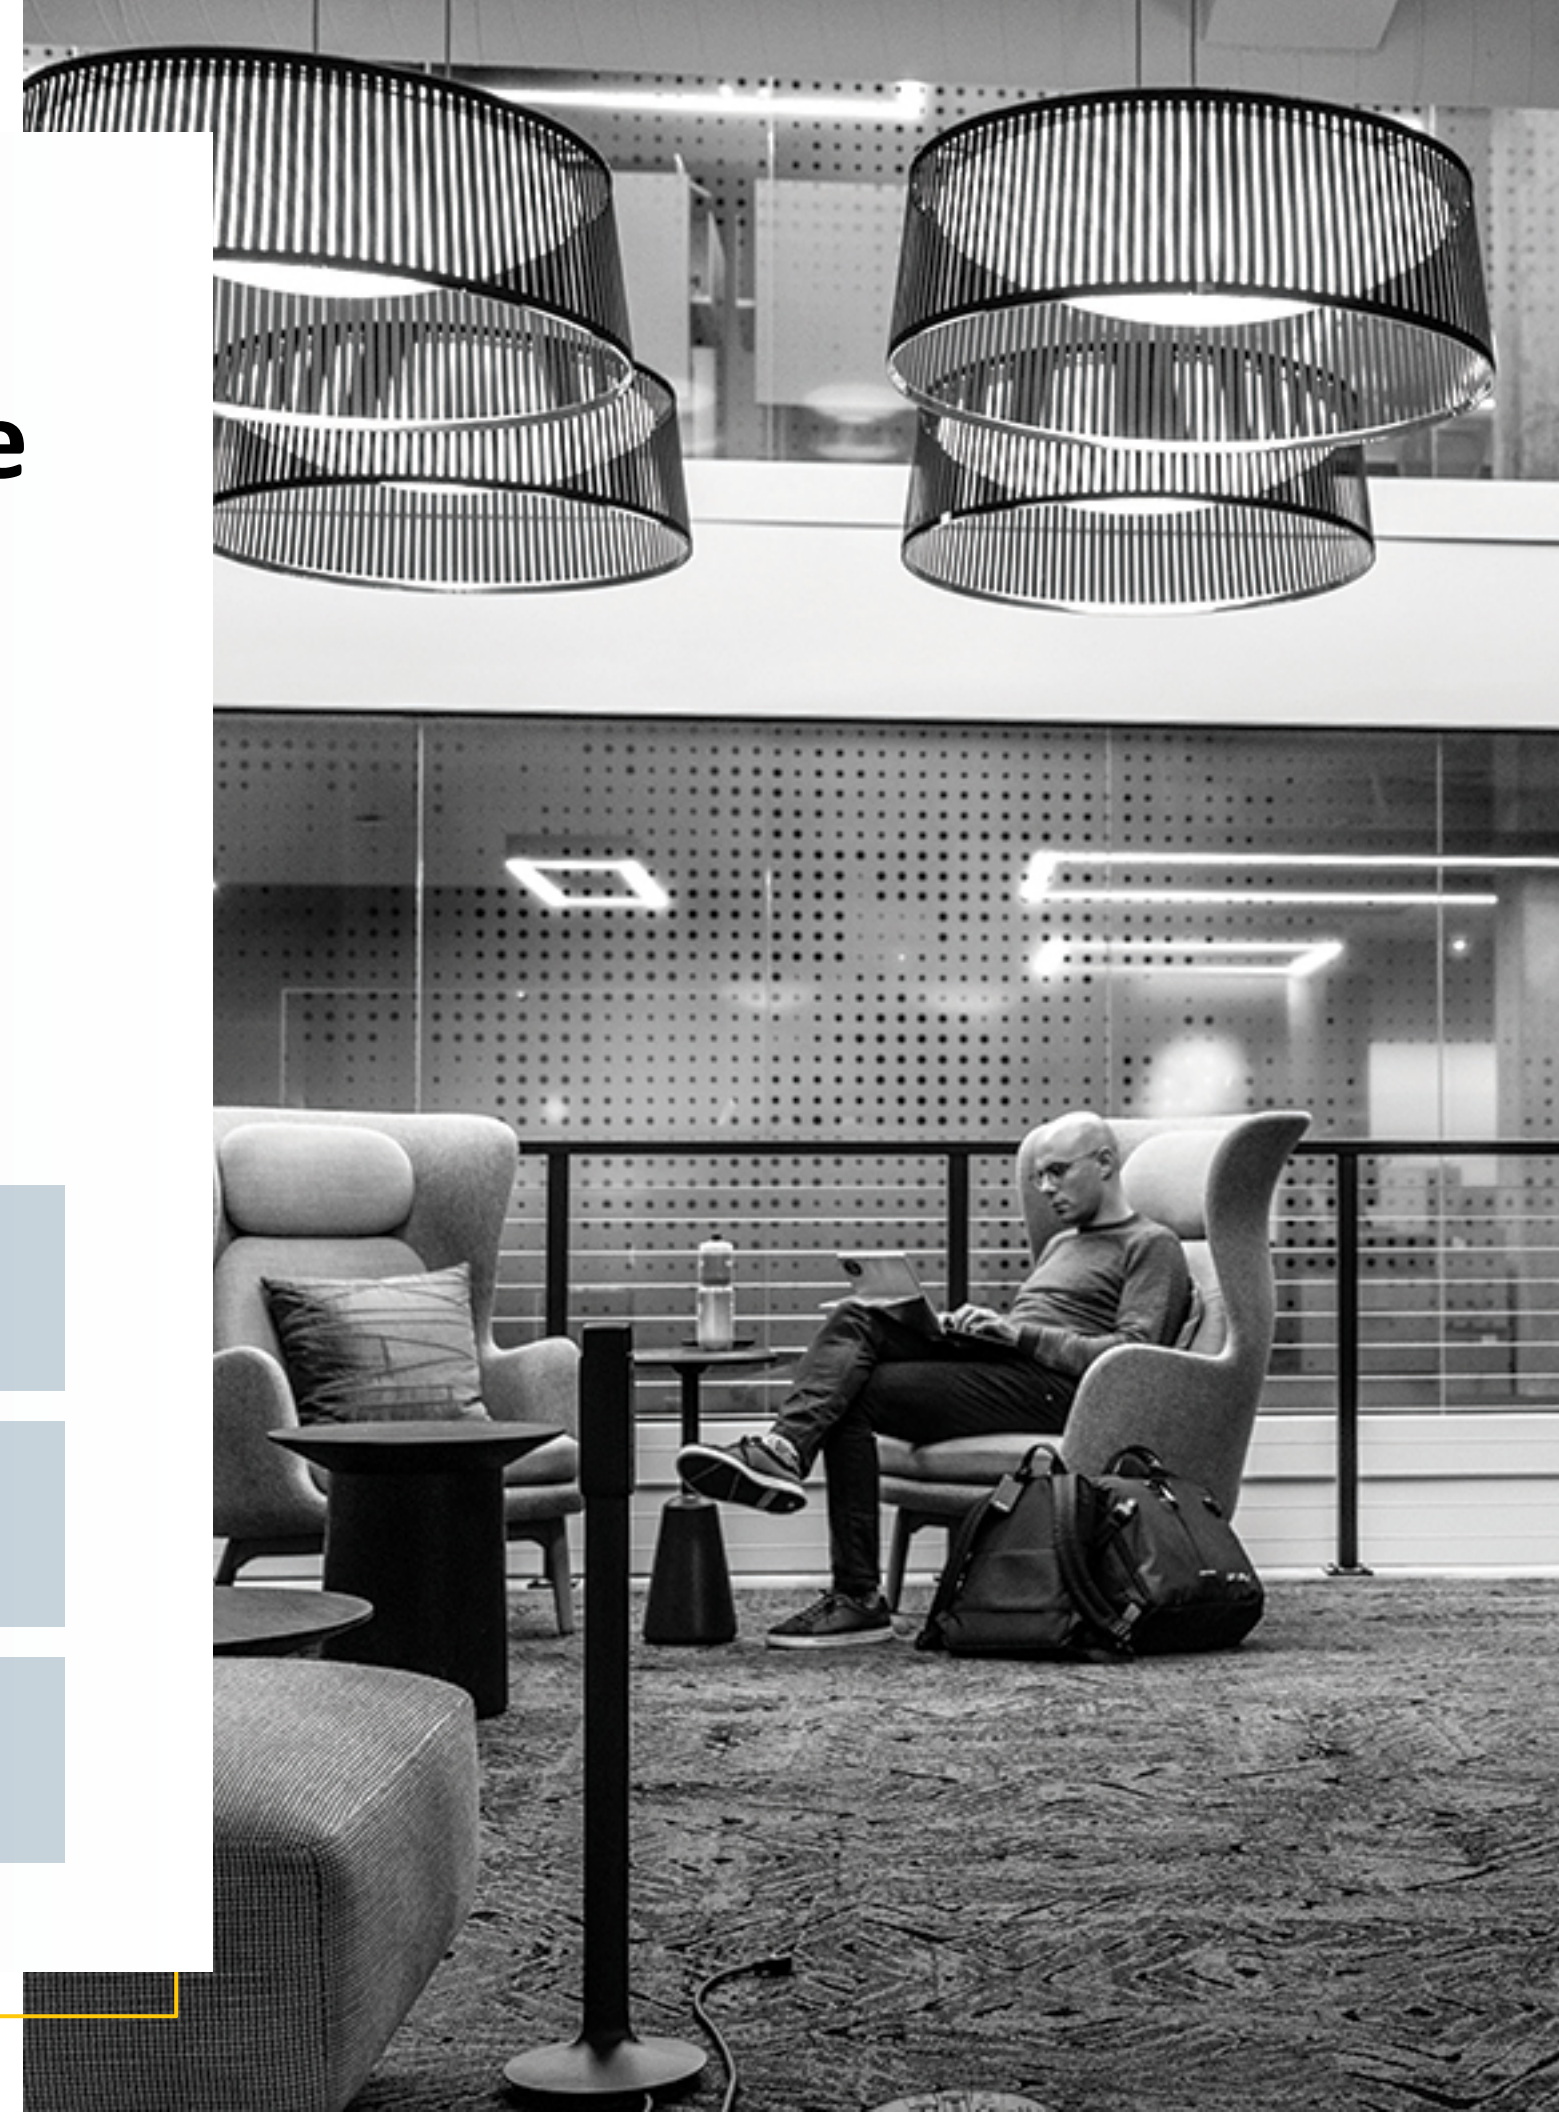

We leverage the power and scalability of the Power Platform to architect, build, and deploy solutions that transform businesses.

Flexibility that benefits every employee

Microsoft Power Apps, Power BI, and Power Automate work together in our solution, so every employee of your business can quickly and easily benefit from its flexibility.

Automation to enable better decisions

Automate workflows to improve business productivity and analyze data for insights. Leverage data to help you make better business decisions.
