

Move and Modernize your Sage Solutions with Microsoft Azure

Consider the challenges when moving workloads to the cloud

Cost of Moving

Are there affordable options that make sense for our needs?

Planning for migration

Are we ready for the move or will our workloads break down?

Go-to for support

Are there different sources for different problems?

Undertaking transformation

What technologies can I depend on when executing our cloud strategy?

Choose Azure and stay with the technology leader you trust

Unparalleled cost savings

Cut back infrastructure expenses associated with traditional on-premises

Assessment and TCO analysis tool to understand your next steps.

Easily plan migrations

Enable rapid replication of your virtual machines with no downtime or interruption.

Ongoing cost optimization reports ensure you're meeting the needs.

First class, first party support

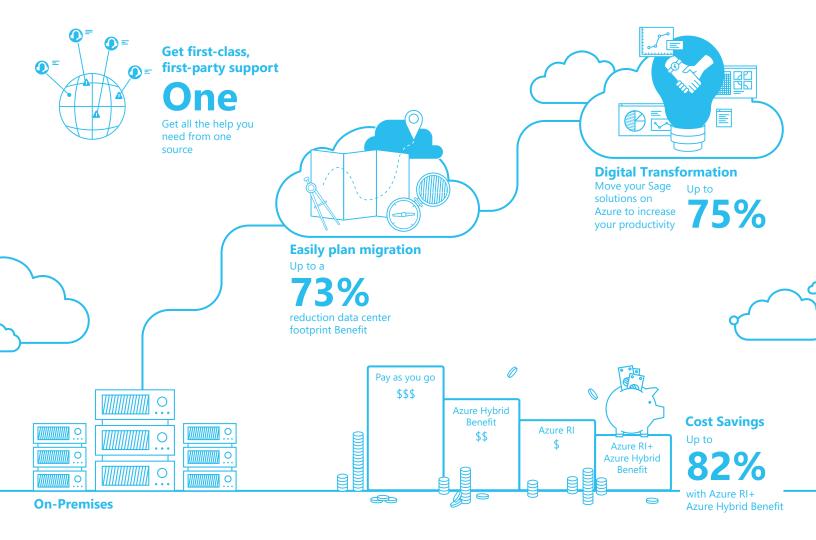

Support from one place, whether specific to workload or the all-up platform.

Available 24x7 and multilingual

Modernize your apps beyond infrastructure

Flexibility, high compatibility and hybrid capabilities

Secure and familiar platform which allows you to get the most out of your current investments

Intro

Korcomptenz, a Microsoft Gold Cloud platform partner has been deploying Azure Cloud for many of our clients who have in the recent weeks accelerated plans for remote and online workforce. With Azure, we are lifting and shifting applications to the cloud that is proven to be useful from application delivery, secure access and scalability.

Take advantage of your current investments and IT skills in Microsoft technologies. Microsoft applications and Azure have been built to work better together with flexibility, high compatibility and hybrid capabilities. Run Windows Server, SQL Server, Sage and other server software on Azure. Enjoy unparalleled cost savings, easily plan migrations, avoid complexity of multivendor support, and modernize your applications in the cloud from the leader you already trust.

Windows Server

Move to the cloud faster, achieve more, and save money with a growing collection of integrated services. It can provide you an end-to-end cloud-based infrastructure services (compute, database, storage, web, analytics, network, and mobile, among others) that make it easy to run business-critical enterprise applications in the cloud in a reliable way.

Evolve existing infrastructure

Move workloads between on-premises and cloud without worrying about downtime

Application Innovation

Deliver faster time to value with agile apps and microservices

Save money with your move

save up to 40 percent on Windows Server virtual machines in Azure

Sage

Sage solutions on cloud can help you increase the effectiveness and transform your global business at a lower cost.

Anywhere Access of your SAGE

Customers can now realize the benefits of cloud innovation, including always up-to-date data capabilities, deployment in seconds (rather than hours), and dynamic scalability on any infrastructure.

High Availability

Explore the shared responsibilities that customers and Azure have in designing and operating resilient apps and systems.

Virtual No Downtime for your SAGE Servers

99.9% uptime guarantee for your SAGE Servers, works even during natural disasters as long as Users have Internet access.

SQL Server

Make smarter decisions, redesign business processes faster, and fuel business growth using the cloud-based data platform solution built for, and on, Azure-bringing together business intelligence, Al, infrastructure, compute, and database services.

Made for hybrid cloud

Your on-premises application can access data in Azure SQL Database. Achieve bottomless capacity, continuous availability, and lower storage costs

Built for Azure

SQL Server offers users easier workload mobility between data centers, private clouds, and Microsoft

At a reasonable cost

Get breakthrough in-memory performance across all workloads—all in one package at a low cost.

Azure supports Legacy Windows and SQL Server versions

Migrate your legacy Windows Server and SQL Server applications to Azure to accelerate innovation with improved cost savings and security.

Innovation

Embrace the tools in Azure to modernize your applications. Focus on business innovation with fully managed services like Azure SQL Database, Azure App Service, and Azure laaS.

Security and compliance

Counter sophisticated cyberthreats with secure cloud foundation and help meet compliance requirements.

Cost savings

Reduce your infrastructure costs with free extended security updates, the Azure Hybrid Benefit, and optimized infrastructure.

Your Migration

Migrate to Azure at your own pace with confidence and support from Microsoft.

Ensure a 360-degree approach to migration—not just the VM; apps drive migration, and all apps have app services, data, and storage elements

Integrated first-party migration tools to enable easy lift/shift of applications, data, and virtual machines to Microsoft Azure

Gain greater ROI with lower TCO

Continual monitoring and powerful performance analysis, as well as post-migration optimization for data health and performance

Strong ecosystem of ISV and SI partners to expand discovery and migration tool offerings; reduce time to migrate through strong migration practices
