## About Smarter SaaS for M365:

Smarter SaaS for M365 is a cloud-based Software Asset Management solution that optimises M365 subscriptions. This service automatically recommends how to reduce IT costs whilst finding the best Microsoft 365 subscriptions for every user

## Dashboard Overview

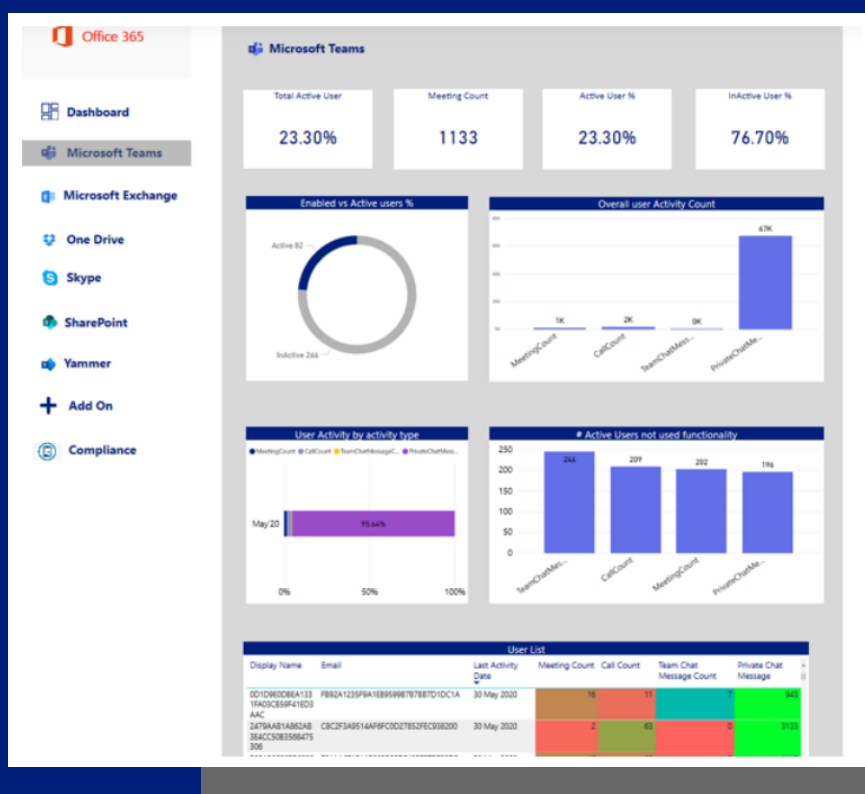

## The Facts:

Smarter SaaS for M365 is an automated, cloud-based, Software Asset Management solution that enables you to recognise and manage the key factors for optimisation. These factors include: lapsed users, non-allocated applications, poor staff training on M365 applications, compliance, or users on the wrong M365 subscription.

## Benefits:

- Never have unused subscriptions
- Build usage of key apps
- Save money on subscription spend
- Increase IT ROI
- Compliance overview
- Microsoft Teams overview

## Microsoft Teams in More Detail

Smarter SaaS for M365 Teams takes away the worry of any oversights whilst preparing for optimisation opportunities, especially with remote staff. These include:

- Understanding Teams application usage
- Ensuring up-to-date Teams applications
- Identification of training needs
- Optimised communication via phone, video call, chats, conferencing, and emails
- Organised group work to ensure teamwork is fluid for creativity and performance, establishing healthy virtual workspaces
- Month by month tracking to show improvements & ROI of remote staff

# Microsoft Compliance in More Detail

**What is Software Compliance?** Software compliance helps ensure you are remaining compliant with your license usage. A big question to consider when trying to implement compliance management is: What am I legally entitled to use? Software compliance focuses on the inventory of your software i.e what you are paying for vs what you are using. By having software compliance strategies in place your business is prepared for audits

TBSC is a pioneer in software asset management. We have developed our latest product, Smarter SaaS for M365 that gives you a smarter way of doing SAM. Our product is easy to use and understand, offering data on license optimisation and compliance. Our Smarter SaaS for MS365 can give detailed data on current installs and usage whilst providing cost savings recommendations and even automatic reharvesting!

When considering if you need to optimise your software licenses, ask yourself these questions:

- Are we using the correct licenses?
- Is the effort of optimizing these licenses reasonable? \*\*make automatic
- What licenses are deployed vs used?
- Can we reharvest licenses?
- Is there a license surplus?
- Are we over-spending on licenses?
