

Bechtle Managed Azure Sentinel Service

Cybercriminals don't turn off at five o'clock. Attacks are becoming more and more diverse and expensive, and in the worst case, the complete loss of corporate data threatens. The "Bechtle Managed Azure Sentinel Service" benefits from Bechtle's many years of experience in the managed service environment and boasts a unique combination of technology know-how and process knowledge.

WHAT IS THE GOAL?

With the "Bechtle Managed Azure Sentinel Service", you get full support on all security issues, 24 hours a day, 7 days a week, if desired.

The goals of the "Bechtle Managed Azure Sentinel Service" are:

- Building a Security Incident and Event Management System
- Implement and manage threat protection
- Identity Access Protection
- Protecting corporate information

OUR OFFER?

Complete solution with 360° perspective

We connect all your Cloud Managed Microsoft services to Azure Sentinel to give you a full view of every security-related activity in your cloud enterprise environment. Everything from the endpoint (Windows 10, Linux, iOS or Android) to Identity, SaaS and azure cloud infrastructure is monitored.

User Case Review

We use all Microsoft Cloud-relevant security data existing for users, devices, applications, and infrastructures in your organization. A profile is created from it, which is then configured in Azure Sentinel as a set of rules in accordance with your technology and architecture.

Experienced Security Operations Center Analysts

You get fully automated threat analysis, classification, and mitigation, and optional advanced hunting by trained and qualified SOC analysts. You don't have to worry about building and maintaining your own SOC infrastructure.

FOR WHOM IS THE SERVICE SUITABLE?

The "Bechtle Managed Azure Sentinel Service" protects you from the following threat scenarios:

- Hacker Attacks
- Threats & Phishing
- Ransomware
- Shadow IT
- Identity theft
