Hyperledger Fabric on Azure Workshop

Description

This will be a live call between you and HCL Hyperledger experts. We will cover the Introduction to Hyperledger fabric and how it should be deployed on Azure. How to choose between various design/deployment choices ranging from AKS, Workbench and Azure blockchain development kit

Key takeaways

- Familiarize yourself with Hyperledger fabric and various components that comprise an enterprise network
- Learn how to deploy Hyperledger fabric on Azure using various design choices
- Discuss your use case and take consulting guidance.

What is covered

- Hyperledger Fabric architecture
- Consensus mechanism
- Hyperledger Fabric network setup
- Deploying the orderer/peer organization
- Hyperledger fabric operations
- Chain code operations

Duration – 120 Minutes
