INSIGHTS IN YOUR BUSINESS

To manage your organization, you want to know what is the current status. Not just what your company did last month. The information must be reliable and it would be even better if you can predict the consequences of an action to be taken. However, your data is stored in different locations, in different systems. Microsoft's BI solutions provide an answer and offer a solution.

TO ENABLE CUSTOMERS TO GENERATE INSIGHTS AND ACTIONS FROM THEIR DATA

It is our goal and aim to bring your company to a high level of full Self Service BI.

Bringing your company to Self Service BI is only possible when the offered program depends on and is applied to your current knowledge level. In an intake we assess your BI maturity and ambition to offer you a company specific development and training plan.

OUR BI SOLUTIONS

ONE-DAY POWER BI BEGINNER TRAINING

In this One-Day BI Beginner training you will build a Power BI report, based on your own organization data. You will learn to import data, to create an interactive report and how to share and refresh. You will immediately be able to apply this knowledge in your own organization.

Investment: from € 1000

ONE-DAY POWER BI ADVANCED TRAINING

As follow-up on the Apprenticeship or when you already have a basic knowledge. You will learn everything that has to do with data modeling and learn the advanced features in Power BI. It's a deep dive into Power BI. You will immediately be able to apply this knowledge in your own organization.

Investment: from € 1000

POWER BI SPECIALIST

Do you need more insight, or do you not have the time or resources to build your own reports and dashboard? Our experienced BI Consultants can help you with their knowledge and can assist you in applying BI in your business. From our experience we have created a variety of functionally, easy to implement, tailored Reporting Modules.

ABOUT DYNAMIC PEOPLE

We are experts on Power BI and the Azure Analytics Platform; moreover, we have ample practical experience in the fields of Business Intelligence and (Financial) Reporting. Through this, we can assist you in applying Power BI in your business. As Microsoft Dynamics 365 consulting and implementation Partner we have full knowledge in Dynamics 365 ERP and CRM, but also other data sources hold no surprises for us.
