

## Remote Work Solution

Remote work has exploded globally, driven by the desire for world-class operators to have more control over their lives. People don't want to waste 10 hours of their week sat in a pollution emitting coffin wasting their life away commuting to work, they want to live where they want and have a far higher quality of life than regular office working allows.

The benefit for companies is equally appealing. Remote workers reduce the cost of provisioning a worker by 80% every single month. By redistributing office space to workers homes, companies free up a huge volume of capital expense by cutting back costs.

Microsoft Teams is a proprietary business communication platform developed by Microsoft, as part of the Microsoft 365 family of products. Teams primarily competes with the similar service Slack, offering workspace chat and videoconferencing, file storage, and application integration.
