

Build, Launch, and Scale Your Projects on the Cloud with Confidence

Self-managed hosting has a low price tag to get started, but often presents hidden costs and indirect expenses as you grow. Some of these costs are easy to anticipate and budget for, such as servers, bandwidth, storage. Other costs that are difficult to anticipate and budget for include non-billable hours spent on infrastructure upkeep, staying on top of security, documentation and disaster recovery.

	Hours	DIY Cost (At \$100/hr)	Cost with ScaleDynamix
★ Development / staging server setup	5 hrs	\$500	Cost Included
★ Git workflow setup and planning	5 hrs	\$500	Cost Included
