

# DPI30 - Your 30-Day Data Platform Modernization Approach on Azure, Powered by FyrSoft

How do you translate your data into meaningful insights? Using Azure Data Services, FyrSoft can help you modernize your data estate in 30 days. Your data represents your business and can be leveraged to help you run it better

- ✓ Integrate multiple data sources to create your own intelligent Data Lake that supports your business strategies
- ✓ Quickly build and deploy intelligent apps, backed by Azure's prebuilt AI capabilities
- ✓ Leverage the technology stack and data engine of your choice (Azure supports a variety of stacks)

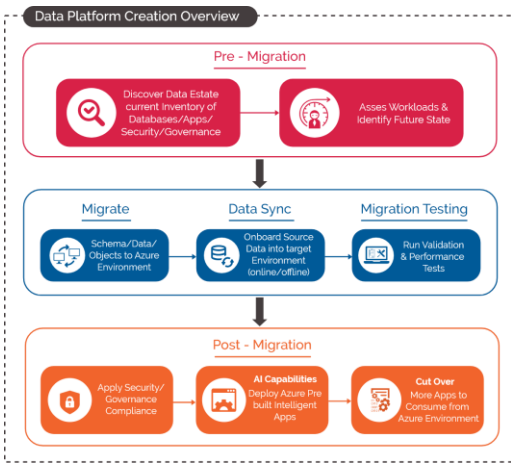

## Your Modern Data Platform – Ready in 30 Days

FyrSoft banks on its comprehensive Azure and data expertise to help you build your modern data platform in 30 days by following this 3-step approach:

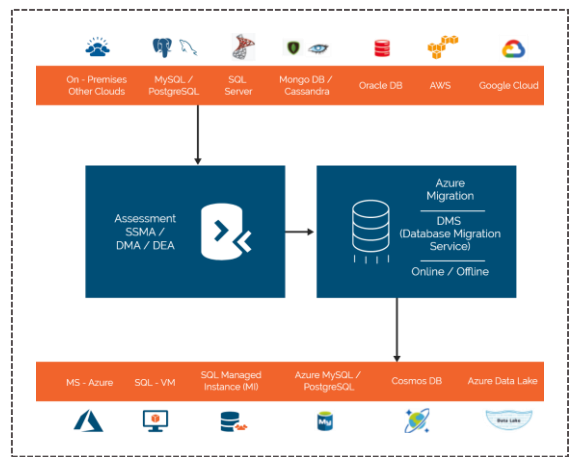

- Envision the role of a modern data and analytics platform for your organization
- Analyze the customer data estate, infrastructure, applications, workloads, and data scenarios to scope the transition requirement
- Design and deploy the Landing Zone for data platform modernization
- Design and implement Azure Data Services to host your data
- Design and build new Business Intelligence insights
- Validate your modern data platform with real-time customer scenarios
- Implement ongoing cloud and data governance
- Review additional scenarios and develop roadmap to an optimized environment based on business goals

### Our Data Platform Modernization Architecture

### Our Data Platform - Tools & Service

## FyrSoft – Your DPI30 Partner

FyrSoft understand the full potential of Azure and Azure Data Services. We have helped enterprises migrate their data estate to Azure and make an innovative leap forward, unlocking new insights and driving business growth.

- We Learn About Your Data Estate**  
We work with you to understand your data estate to identify the customer scenarios needed to drive your business forward
- Comprehensive Guidance on Your Modernization Journey**  
As a contributor to Microsoft's Cloud Adoption Framework we have identified best practices and developed frameworks that ensure your data platform modernization delivers the insights you need
- We Transition Expertise to You**  
We put you behind the wheel of your modernized data platform so you can drive it forward with appropriate Data Governance and controls
- Your Certified DPI30 Partner**  
Our recognized partnership with Microsoft ensures your data platform modernization journey is in expert hands
- Constant Support**  
We ensure that your modern data platform effort has prioritized access to our support, backed by Microsoft

## Check out our data platform modernization stories here

### Accuweather

Accuweather wanted to build a Data Lake by integrating its disparate data sources on Azure. FyrSoft integrated terabytes of data to build a Data Lake and enabled ML capabilities to help the customer derive meaningful insights. Accuweather leveraged the insights to implement advanced, real-time advertising to region-specific customers on predicted weather patterns.

### Washington State Investment Board

WSIB wanted to build a centralized dashboard and a Business Intelligence solution that provides operational data. FyrSoft worked with WSIB to identify all data sources, data points, user perspectives, and questions they wanted the data to answer and how. That helped us build dashboard templates for different views of identical datasets. We then built the dashboard by leveraging the FyrSoft WebTop solution and Microsoft Power BI.
