

System Assessment Service

System assessment service is a 4 hour consulting service that helps you to identify your weak spots in your existing system, evaluate your existing operation processes and compare to the industry best practices, understand risk inherent in your existing system and how to improve your operation efficiency with the latest technology.

What can you get from the system assessment service?

- Full and clear picture of your existing system with breakdown in system, people, workflow process and technology
- Identify strengths and weaknesses of your existing operation
- Improvement suggestion according to your operation weaknesses
- Roadmap for improving your existing operation
