## Egnyte for Microsoft Office Desktop

Users working on their desktop computers have the ability to open files and save them to Egnyte within Microsoft Office applications. In Microsoft Outlook, save files directly to Egnyte and generate shared links to Egnyte files in a seamless user experience. The Egnyte for Microsoft Office Desktop plugin includes add-ins for Outlook, Word, Excel, and PowerPoint.

### Features

#### Word, Excel, PowerPoint

Create new Microsoft Word, Excel, and PowerPoint documents and save them directly to Egnyte. Within the Office application, users can browse their Egnyte File system and open and edit documents. When a document is opened, the file will be locked in Egnyte. Every time the document is saved, a new version will automatically upload to Egnyte.

#### Outlook

Within Microsoft Outlook, users can send links to Egnyte files and folders, upload files to Egnyte, and request files to be uploaded to Egnyte. Users can also save email attachments directly to an Egnyte folder.

Requirements

Egnyte Office integration must be installed on the computer.

- Windows 10

Note

Egnyte (/hc/en-us/articles/360036118271) ended support for Windows 7, 8, and 8.1 on January 14th, 2020.

- Office 2010, Office 2013, and Office 2016

Office Online

No matter where team members are located, they can collaborate in real-time using Office Online (Word, Excel, and PowerPoint) with the benefits of Egnyte’s secure and easy file-sharing solution.

Features

Co-Authoring

Multiple users can work on a document stored in Egnyte in real-time by utilizing Office Online. When multiple users have the same document open in Office Online, they are able to edit and collaborate.

All Supported Mobile Devices

Users can add Egnyte as a document provider within the Office apps, allowing Egnyte files to be browsed, accessed, and edited directly within the Office mobile apps.

Requirements

- Latest Egnyte app and Office mobile apps on the user’s mobile device
- Microsoft requires a paid Office 365 for Business subscription to edit files (read-only preview mode has no charge)

Egnyte for SharePoint Online

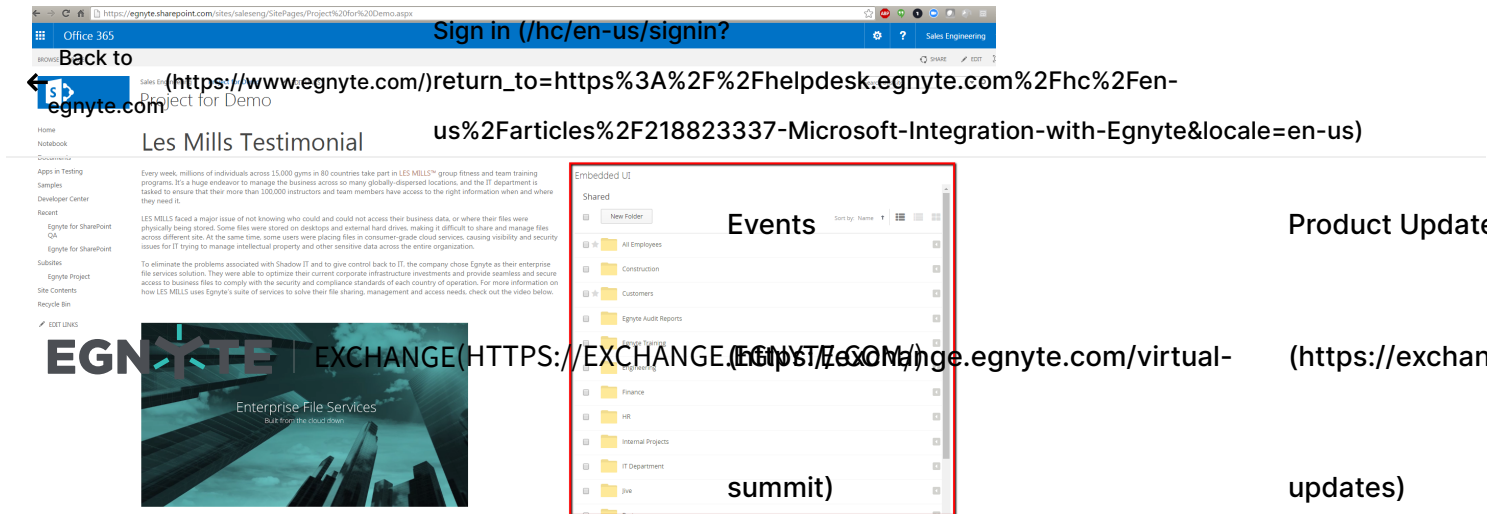

The Egnyte for SharePoint Online integration allows you to embed your Egnyte file server within the SharePoint site. Utilize all of the features of the Egnyte Web UI to manage your files. The directly embedded Egnyte interface ensures that your SharePoint documentation always reflects the most up-to-date information without having to constantly replace and re-upload the file to SharePoint.

Embedded View

Embed the Egnyte Web UI on a SharePoint Site page.
