Study guide for Exam SC-900: Microsoft Security, Compliance, and Identity Fundamentals

Purpose of this document
This study guide should help you understand what to expect on the exam and includes a summary of the topics the exam might cover and links to additional resources. The information and materials in this document should help you focus your studies as you prepare for the exam.

Updates to the exam

Our exams are updated periodically to reflect skills that are required to perform a role. We have included two versions of the Skills Measured objectives depending on when you are taking the exam.

We always update the English language version of the exam first. Some exams are localized into other languages, and those are updated approximately eight weeks after the English version is updated. While Microsoft makes every effort to update localized versions as noted, there may be times when the localized versions of an exam are not updated on this schedule. Other available languages are listed in the Schedule Exam section of the Exam Details webpage. If the exam isn’t available in your preferred language, you can request an additional 30 minutes to complete the exam.

Note

The bullets that follow each of the skills measured are intended to illustrate how we are assessing that skill. Related topics may be covered in the exam.

Note

Most questions cover features that are general availability (GA). The exam may contain questions on Preview features if those features are commonly used.

Skills measured as of May 5, 2023

Audience profile

This certification is targeted to those looking to familiarize themselves with the fundamentals of security, compliance, and identity (SCI) across cloud-based and related Microsoft services.

This is a broad audience that may include business stakeholders, new or existing IT professionals, or students who have an interest in Microsoft security, compliance, and identity solutions.

Candidates should be familiar with Microsoft Azure and Microsoft 365 and want to understand how Microsoft security, compliance, and identity solutions can span across these solution areas to provide a holistic and end-to-end solution.

- Describe the concepts of security, compliance, and identity (10–15%)
- Describe the capabilities of Microsoft Azure Active Directory, part of Microsoft Entra (25–30%)
- Describe the capabilities of Microsoft Security solutions (25–30%)
- Describe the capabilities of Microsoft compliance solutions (25–30%)
Describe the concepts of security, compliance, and identity (10–15%)

Describe security and compliance concepts
- Describe the shared responsibility model
- Describe defense in depth
- Describe the Zero-Trust model
- Describe encryption and hashing
- Describe compliance concepts

Define identity concepts
- Define identity as the primary security perimeter
- Define authentication
- Define authorization
- Describe identity providers
- Describe Active Directory
- Describe the concept of Federation

Describe the capabilities of Microsoft Azure Active Directory (Azure AD), part of Microsoft Entra (25–30%)

Describe the basic identity services and identity types of Azure AD
- Describe Azure AD
- Describe Azure AD identities
- Describe hybrid identity
- Describe the different external identity types

Describe the authentication capabilities of Azure AD
- Describe the authentication methods available in Azure AD
- Describe Multi-factor Authentication
- Describe self-service password reset
- Describe password protection and management capabilities available in Azure AD

Describe access management capabilities of Azure AD
- Describe conditional access
- Describe the benefits of Azure AD roles.
- Describe the benefits of Azure AD role-based access control

Describe the identity protection and governance capabilities of Azure AD
- Describe identity governance in Azure AD
- Describe entitlement management and access reviews
- Describe the capabilities of Azure AD Privileged Identity Management (PIM)
- Describe Azure AD Identity Protection

Describe the capabilities of Microsoft Security solutions (25–30%)

Describe basic security capabilities in Azure
- Describe Azure DDoS protection
- Describe Azure Firewall
- Describe Web Application Firewall
- Describe Network Segmentation with Azure Virtual Networks
- Describe Azure Network Security groups
- Describe Azure Bastion and JIT Access
- Describe ways Azure encrypts data

Describe security management capabilities of Azure
- Describe Cloud security posture management (CSPM)
- Describe Microsoft Defender for Cloud
- Describe the enhanced security features of Microsoft Defender for Cloud
- Describe security baselines for Azure

Describe security capabilities of Microsoft Sentinel
- Define the concepts of SIEM and SOAR
- Describe how Microsoft Sentinel provides integrated threat management

Describe threat protection with Microsoft 365 Defender
- Describe Microsoft 365 Defender services
- Describe Microsoft Defender for Office 365
- Describe Microsoft Defender for Endpoint
- Describe Microsoft Defender for Cloud Apps
- Describe Microsoft Defender for Identity
- Describe the Microsoft 365 Defender portal

Describe the capabilities of Microsoft compliance solutions (25–30%)

Describe Microsoft’s Service Trust Portal and privacy principles
- Describe the offerings of the Service Trust portal
- Describe Microsoft’s privacy principles

Describe the compliance management capabilities of Microsoft Purview
- Describe the Microsoft Purview compliance portal
- Describe compliance manager
- Describe the use and benefits of compliance score
Describe information protection and data lifecycle management capabilities of Microsoft Purview

- Describe data classification capabilities
- Describe the benefits of content explorer and activity explorer
- Describe sensitivity labels and sensitivity label policies
- Describe Data Loss Prevention (DLP)
- Describe Records Management
- Describe Retention Policies, Retention Labels and retention label policies

Describe insider risk capabilities in Microsoft Purview

- Describe Insider Risk Management
- Describe communication compliance
- Describe information barriers

Describe resource governance capabilities in Azure

- Describe Azure Policy
- Describe Azure Blueprints
- Describe the Microsoft Purview unified data governance solution

Study resources

We recommend that you train and get hands-on experience before you take the exam. We offer self-study options and classroom training as well as links to documentation, community sites, and videos.

Change log

Key to understanding the table: The topic groups (also known as functional groups) are in bold typeface followed by the objectives within each group. The table is a comparison between the two versions of the exam skills measured and the third column describes the extent of the changes.

### Skills measured prior to May 5, 2023

#### Audience profile

This certification is targeted to those looking to familiarize themselves with the fundamentals of security, compliance, and identity (SCI) across cloud-based and related Microsoft services.

This is a broad audience that may include business stakeholders, new or existing IT professionals, or students who have an interest in Microsoft security, compliance, and identity solutions.

Candidates should be familiar with Microsoft Azure and Microsoft 365 and want to understand how Microsoft security, compliance, and identity solutions can span across these solution areas to provide a holistic and end-to-end solution.

- Describe the concepts of security, compliance, and identity (10–15%)
• Describe the capabilities of Microsoft Azure Active Directory (Azure AD), part of Microsoft Entra (25–30%)
• Describe the capabilities of Microsoft Security solutions (25–30%)
• Describe the capabilities of Microsoft compliance solutions (25–30%)

Describe the concepts of security, compliance, and identity (10–15%)

Describe security and compliance concepts
• Describe the shared responsibility model
• Describe defense in depth
• Describe the Zero-Trust model
• Describe encryption and hashing
• Describe compliance concepts

Define identity concepts
• Define identity as the primary security perimeter
• Define authentication
• Define authorization
• Describe identity providers
• Describe Active Directory
• Describe the concept of Federation

Describe the capabilities of Microsoft Azure Active Directory (Azure AD), part of Microsoft Entra (25–30%)

Describe the basic identity services and identity types of Azure AD
• Describe Azure AD
• Describe Azure AD identities
• Describe hybrid identity
• Describe the different external identity types

Describe the authentication capabilities of Azure AD
• Describe the authentication methods available in Azure AD
• Describe Multi-factor Authentication
• Describe self-service password reset
• Describe password protection and management capabilities available in Azure AD

Describe access management capabilities of Azure AD
• Describe conditional access
• Describe the benefits of Azure AD roles.
• Describe the benefits of Azure AD role-based access control
Describe the identity protection and governance capabilities of Azure AD
- Describe identity governance in Azure AD
- Describe entitlement management and access reviews
- Describe the capabilities of Azure AD Privileged Identity Management (PIM)
- Describe Azure AD Identity Protection

Describe the capabilities of Microsoft Security solutions (25–30%)

Describe basic security capabilities in Azure
- Describe Azure DDoS protection
- Describe Azure Firewall
- Describe Web Application Firewall
- Describe Network Segmentation with Azure Virtual Networks
- Describe Azure Network Security groups
- Describe Azure Bastion and JIT Access
- Describe ways Azure encrypts data

Describe security management capabilities of Azure
- Describe Cloud security posture management (CSPM)
- Describe Microsoft Defender for Cloud
- Describe the enhanced security features of Microsoft Defender for Cloud
- Describe security baselines for Azure

Describe security capabilities of Microsoft Sentinel
- Define the concepts of SIEM and SOAR
- Describe how Microsoft Sentinel provides integrated threat management

Describe threat protection with Microsoft 365 Defender
- Describe Microsoft 365 Defender services
- Describe Microsoft Defender for Office 365
- Describe Microsoft Defender for Endpoint
- Describe Microsoft Defender for Cloud Apps
- Describe Microsoft Defender for Identity
- Describe the Microsoft 365 Defender portal

Describe the capabilities of Microsoft compliance solutions (25–30%)

Describe Microsoft’s Service Trust Portal and privacy principles
- Describe the offerings of the Service Trust portal
- Describe Microsoft’s privacy principles
Describe the compliance management capabilities of Microsoft Purview
- Describe the Microsoft Purview compliance portal
- Describe compliance manager
- Describe the use and benefits of compliance score

Describe information protection and data lifecycle management capabilities of Microsoft Purview
- Describe data classification capabilities
- Describe the benefits of content explorer and activity explorer
- Describe sensitivity labels
- Describe Data Loss Prevention (DLP)
- Describe Records Management
- Describe Retention Policies and Retention Labels

Describe insider risk capabilities in Microsoft Purview
- Describe Insider Risk Management
- Describe communication compliance
- Describe information barriers

Describe resource governance capabilities in Azure
- Describe Azure Policy
- Describe Azure Blueprints
- Describe the Microsoft Purview unified data governance solution
