

# Windows AutoPilot

## 1- Day Proof Of Concept (PoC)

Windows AutoPilot simplifies the process for the IT department and requires minimal to non infrastructure to manage.

### What is Windows AutoPilot?

Windows Autopilot is a collection of technologies used to set up and pre-configure new devices, getting them ready for productive use. You can also use Windows Autopilot to reset, repurpose and recover devices. This solution enables an IT department to achieve the above with little to no infrastructure to manage, with a process that's easy and simple.

Windows Autopilot is designed to simplify all parts of the lifecycle of Windows devices, for both IT and end users, from initial deployment through the eventual end of life. Leveraging cloud-based services, it can reduce the overall costs for deploying, managing, and retiring devices by reducing the amount of time that IT needs to spend on these processes and the amount of infrastructure that they need to maintain, while ensuring ease of use for all types of end users.

### Benefits of Windows Autopilot

Traditionally, IT pros spend a lot of time building and customizing images that will later be deployed to devices. Windows Autopilot introduces a new approach.

From the user's perspective, it only takes a few simple operations to make their device ready to use.

From the IT pro's perspective, the only interaction required from the end user is to connect to a network and to verify their credentials. Everything beyond that is automated.

### With this PoC you will receive

- Mapping of the technical components within AutoPilot
- A Windows Autopilot profile setup
- A brief demonstration of how to enroll clients using AutoPilot
- Brief review of Azure AD and association with AutoPilot
- A review of the customer's environment and needs afterwards

Gold  
Microsoft  
Partner

With Windows AutoPilot, you can implement modern customer management and reduce money and resources for IT departments.

Move has more than 30 years of experience in digitalization and transformation projects. We are in close cooperation with all the leading tech vendors. We are brand agnostic and pride ourselves on giving our customers the best advice based on their needs and the technology available.
