

CASPER365®

Empower your digital transformation

Casper365's cloud provisioning platform completely automates the deployment of complex SharePoint sites directly into Office 365, without the need for code or expensive development work.

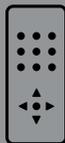

As part of your monthly Enterprise subscription you will have full access to the Casper365 cloud platform, this includes a mix of bespoke templates, Casper365 templates and SharePoint Online support that really accelerates your teams getting them to work smarter, quickly.

Casper365 is equally important for partners since it empowers them to deploy SharePoint Online templates to multiple client tenancies, contact us for more information.

Supported

Fully backed by an experienced SharePoint support team

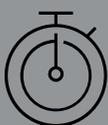

Delegated User Control

Allow users to create the site they need exactly how they need them

Self Service

Users can click to deploy. No more IT support tickets to create a project site

Time Saving

Deploy up to 60 times faster. Fast, efficient and right every time

Consistent

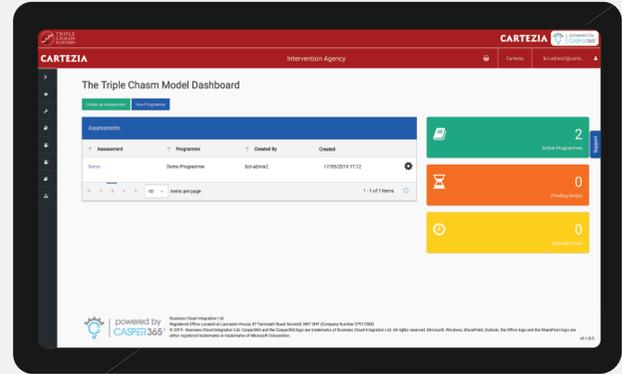

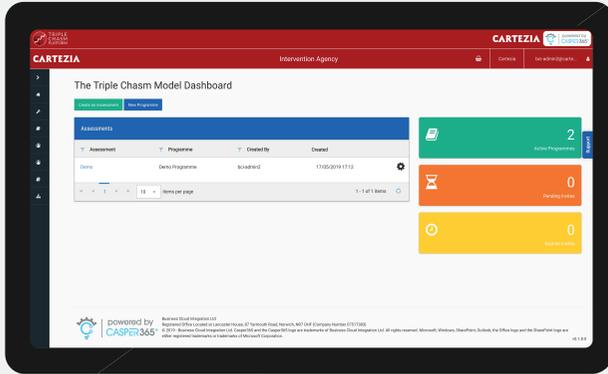

Same site every time. Consistent and compliant

Complex Solutions

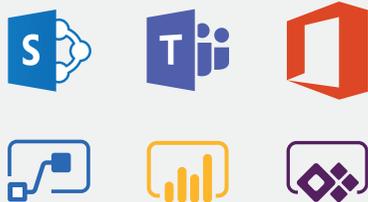

Deployed with ease. No matter how complex the solution

Fast Track your SharePoint
