Civility, safety & interaction online: Italy

In an effort to promote safer, healthier, and more respectful online interactions among all people since 2016, Microsoft has been surveying teens and adults around the world about the state of digital civility. This latest survey marks the fifth straight year of that research, where we again asked respondents about their exposure to 21 different online risks across four categories: behavioral, sexual, reputation, and personal/intrusive. In total, over 16,000 respondents in 32 geographies participated (501 in Italy), equally divided between teens and adults The research was completed in April and May 2020. Read on for a summary of the latest results, some of which may surprise you.

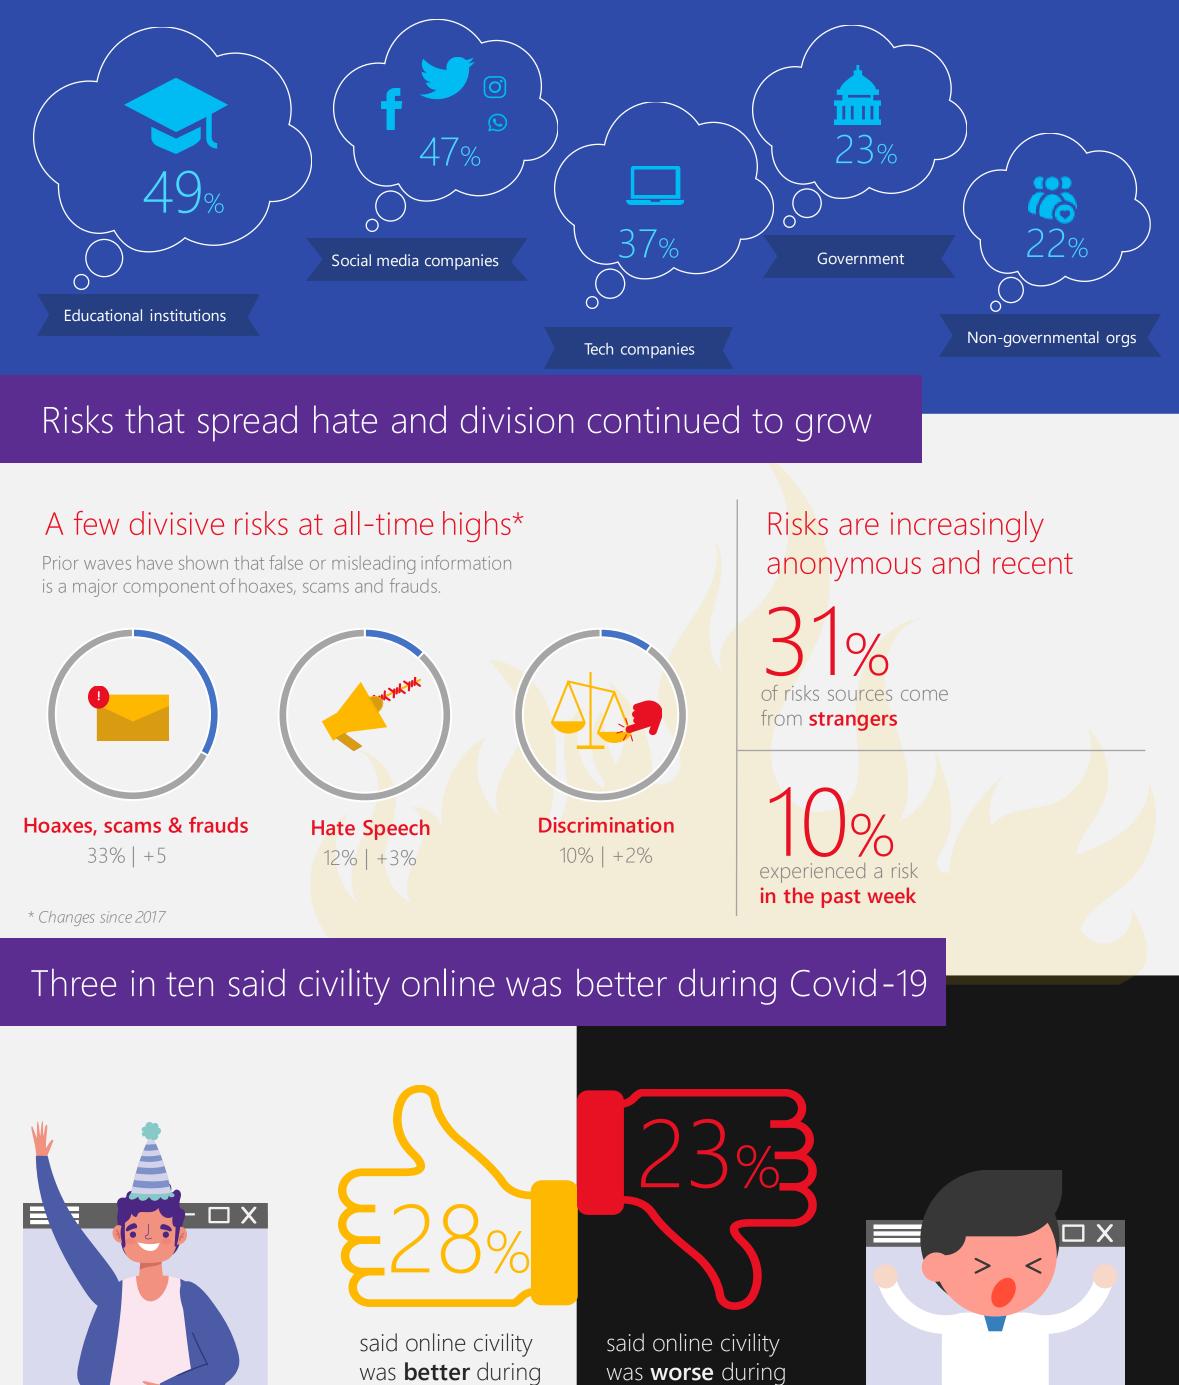

Digital Civility improved by 2 points to 64

Rating overall online civility

Educational Institutions expected to make biggest contribution to improving online civility in the 2020s

Better online civility was attributed to a greater sense of community and a feeling we are all in this crisis together

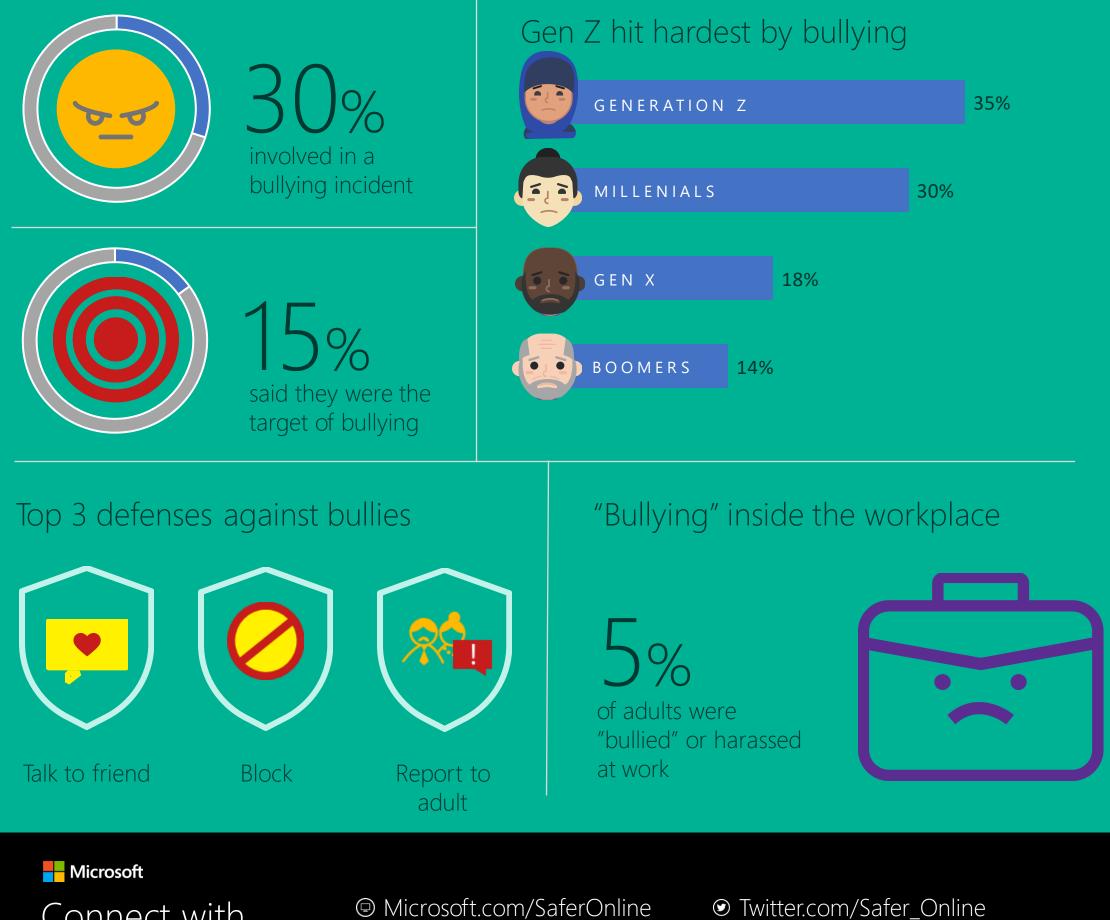

Greater spread of false & misleading information and

the pandemic

people taking their frustrations out online were most often cited as how online civility worsened

3 in 10 involved in a bullying incident

the pandemic
