# Windows Virtual Desktop

Windows Virtual Desktop (WVD) enables access to your desktop and applications from anywhere. It is compatible with Windows 10 and provides a new scalable multi-session experience for the end users. WVD gives opportunity to save costs by using the same Windows licenses.

## TECHNOLOGY BENEFITS

### MULTI-LAYERED SECURITY

CredentialGuard protects the network while Advanced Threat Protection detects attacks that have made it past all other defenses

### COMPLIANCE WITH INDUSTRY/PRIVACY

Windows Virtual Desktop compliance certifications include ISO 27001, 27018 and 27701, PCI, FedRAMP High for Commercial and HIPPA

### BUSINESS CONTINUITY

Persistent, on-demand and just-in-time work scenarios – with offline and on-device access for more productive experiences.

### FLEXIBILITY

Accelerate Ability to support AI and graphics-intensive workloads using scalable cloud resources

## WHY TRUST WINDOWS VIRTUAL DESKTOP?

### Built-in Security

- ✓ Securely store all your employee and company data in Azure instead of local desktops
- ✓ Leverage Azure security offering such as Azure Firewall, Azure Security Center, Azure Sentinel and Microsoft Defender ATP for end to end security from the endpoint to the applications

### Dynamic policy engines

- ✓ Use conditional access to manage risks before you grant users access to your Windows Virtual Desktop environment
- ✓ Setup Multi-factor authentication for secure login
- ✓ Protect your Azure infrastructure by enabling role-based access control (RBAC) and detect threats using Azure Security Center
