1 Introduction

Agilisys, an employee owned organisation, is one of the UK's fastest growing and innovative cloud and digital transformation specialists, enabling organisations to adopt technologies, platforms and processes that promote new ways of working and help organisations transform. Working for both the public and private sector for over 20 years, we have earned a strong reputation and hold deep domain expertise delivering change and innovation, within local and central government. Our public sector cloud and IT services have been designed to accelerate cloud adoption and enable transformation.

We combine technology, tested methodologies and skills that unleash the power of cloud and minimise the complexity that can sometimes come with migration. We put strategy before technology and deliver the skills, experience and capacity needed to make the right cloud decisions and transform public services. The cloud is having a profound impact on how technology is being delivered. Having the right data platform has become a must for every organisation. However, understanding how to make data accessible whilst maintaining data security and optimising use of cloud and staff resources is a common challenge for many.

1.1 Agilisys Data Platform

The Agilisys Data Platform 5-week assessment helps organisations to make better use of their data platforms, saving money and improving security. We work closely with our clients and their organisations to identify and assess ways they can reduce cost by consolidating database instances, rationalising licenses, resources and modernise estates onto cloud data platforms. The assessment will highlight technical debt, new ways of using Azure data services for enhanced analytics and business intelligence. Allowing the platform to deliver greater insights.

Features:

- Microsoft Gold Partner – Data Platform and Data Analytics
- All Staff UK based
- Managed by UK based Security Check (SC) cleared staff.
- A MS Certified team of Data Engineers & Data Platform SMEs

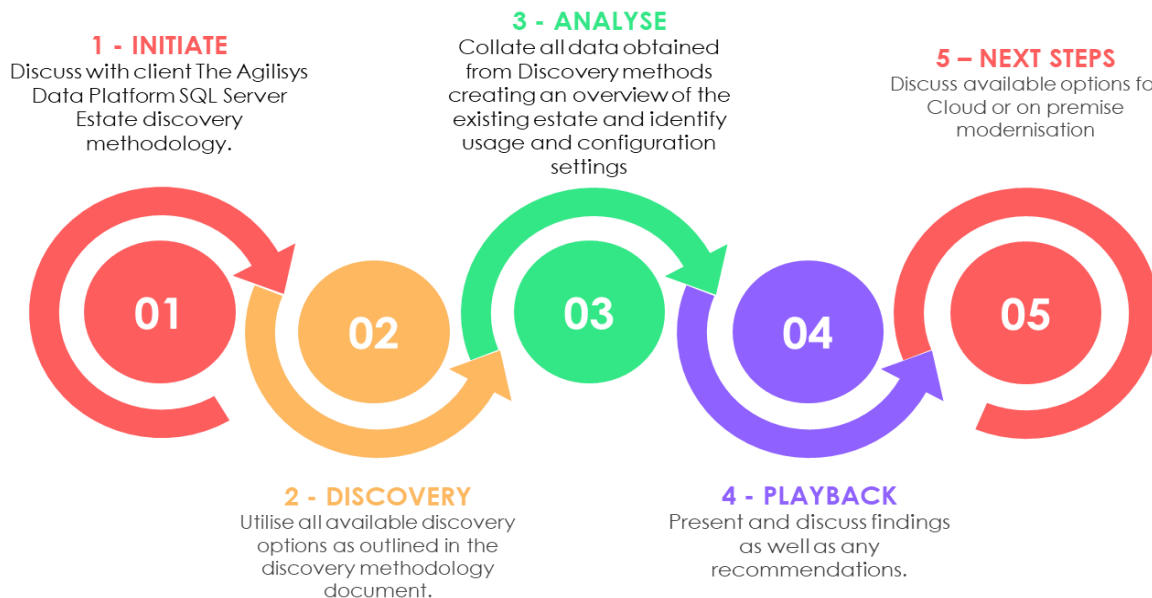

Benefits:

- Optimisation of business-critical data services
- Best practice implementations focused on value.
- Detailed playback report to help build business case for modernisation.
- Agilisys Database Platform best in class standards applied.

2 Overview of Data Platform Modernisation

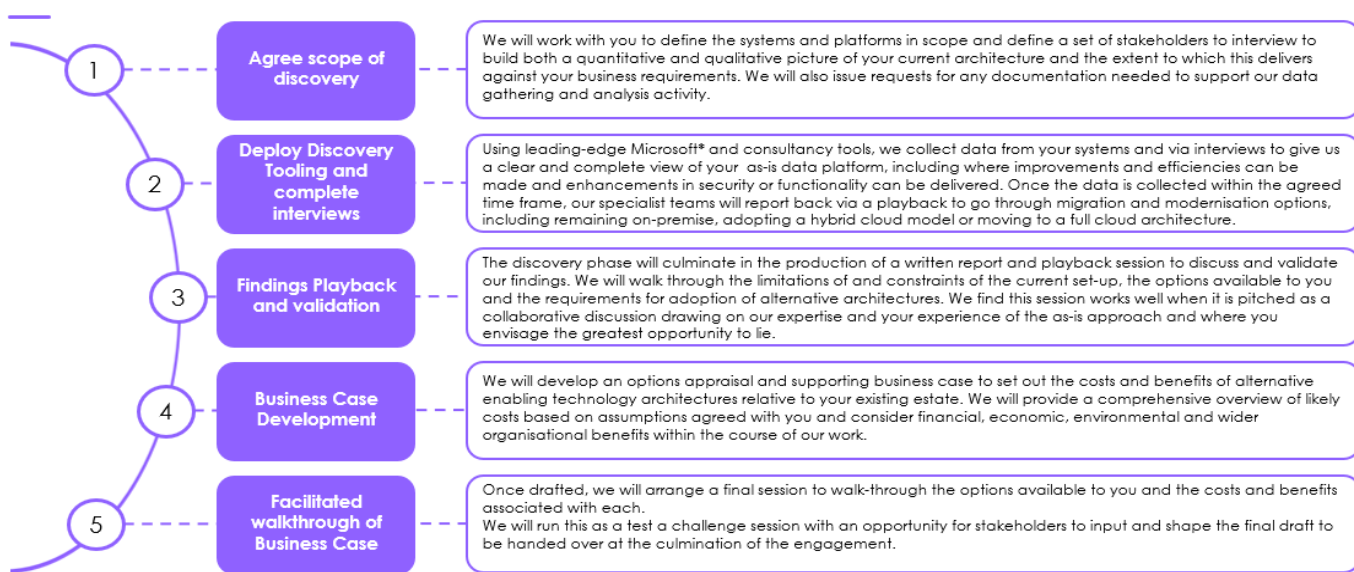

Service Definition

Over the 5-week programme, our consultants will work with you to review your existing data platform, analyse whether it is working as efficiently as possible, and recommend cost-effective ways of improving performance and demonstrate routes to Azure. This includes security best practices. Our approach is a simple 5 step process:

During the 5 week programme we will feed into our comprehensive report, which is created as part of the discovery and playback deliverables listed below:

Discovery and Playback

2.1 Microsoft Client Terms and Conditions

The customer is obliged to accept Microsoft terms and conditions in relation to the Microsoft Azure Services, which can be found by following the below links:

Microsoft Cloud Agreement: <https://docs.microsoft.com/en-us/partner-center/agreements>

Online Services Terms: <http://www.microsoftvolumelicensing.com/>

Microsoft Azure agreements become effective on the date that your Reseller provisions your Subscription.

2.2 Microsoft Service Level Agreement

Microsoft's Service level agreements and Service Credits for Azure services are found by following the link below:

Online Services SLA - <http://www.microsoftvolumelicensing.com/>
