

ArthurDoc

PRIMESOFT POLSKA SP. Z O.O.

Primesoft Polska provides complex Enterprise systems including workflow, document and business process management system, as well as document archiving and management. We have realised more than 200 system implementations with over 150 thousand system users. As a market leader, Primesoft Polska provides services to listed companies, multinationals, capital groups, banks and financial organizations, public companies and a number of companies being the world leaders in their industries.

WHY ARE WE DIFFERENT?

ArthurDoc is designed both for internal business processes of a company and for client oriented processes. It enables generation of a single document as well as batch processing of hundreds of thousands of documents.

ArthurDoc facilitates the process of a document creation making it faster and automated quaranting content and form corectness.

The documents are generated based on the templates created with the use of widely available tools such as MS Office. The user matches the fields created in a template with the source data document fields.

There is a repository of templates embeded in the system with the mechanism enabling versioning and management of permissions.

The data for the templates come from either the existing database systems or text files as well as other sources.

ARTHURDOC

It is an intuitive and simple tool for mass and quick generation of documents.

It is a scalable and safe cloud-base solution.

The tool is easy to implement and possible to work in any organization.

To create the templates of the documents no professional knowledge is required.

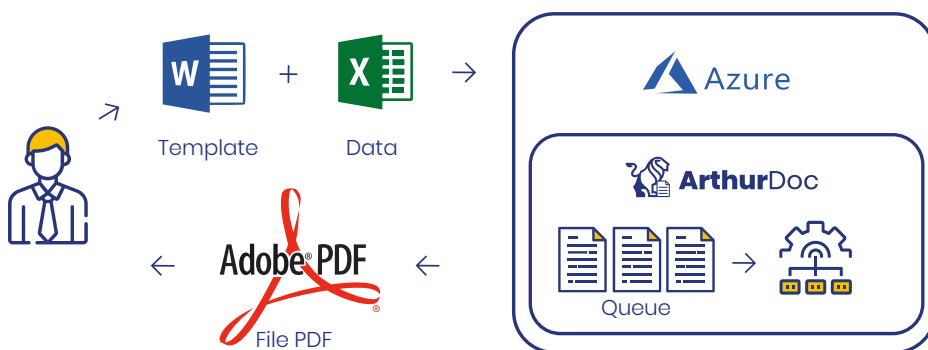

MAIN CLIENTS

ArthurDoc

HOW IT WORKS?

Step 1

Have a form prepared and define input data.

Step 2

input/insert data (different data sources: Excel, CSV, JSON, XML).

Step 3

Wait for the docs to be ready for a download.

Step 4

Download the files and enjoy your docs.

MECHANISMS OF DOCS GENERATION:

Microsoft Word

Adobe XFDL (XML Forms Data Format)

Apache FOP (Formatting Objects Processor)

OTHER FUNCTIONALITIES ARTHURDOC:
