

## Digital on Demand

A PwC Product

# What if you had access to trusted automations that help drive ROI today?

### The challenge

66% of companies believe profitability will suffer if they don't digitally transform quickly enough. However, the adoption and ROI of traditional digital transformation initiatives isn't realized for years.

### Our solution: Digital on Demand

**Trusted automations that help drive time savings and ROI.**

In 2017, we made a \$3 billion global investment in our New World New Skills upskilling initiative, empowering our employees who built more than 6,500 digital automations to drive digital transformation for ourselves and our clients.

**Now, we're giving your team access to our trusted, impactful inventory to power your productivity.**

### Inside Digital on Demand

Curated assets built and trusted by PwC finance and technology professionals that help your team access, transform and review data, perform complex calculations, create data visualizations, and automate tasks, all accelerated by the use of AI and automation. The constantly expanding and evolving inventory will help you achieve digital transformation at scale.

**Your team's digital potential is well within reach, and more accessible than ever.**

## Curated digital assets that help to improve efficiencies and drive ROI

- Downloadable assets such as bots, workflows and visualizations that are customizable to meet your organization's needs
- Cloud-based assets ingest data, conduct highly complex calculations and deliver results that your team can immediately use

## Finance process maps provide blueprints to identify automation opportunities in your team's work

- Procure to Pay
- Tax Planning and Accounting
- Order to Cash
- Record to Report
- Acquire to Retire
- Financial Planning & Analysis
- Internal Audit
- Payroll
- Treasury

...Additional corporate functions
