# Managed Security Service

"Effective Cybersecurity can be difficult. Complexity
is often a detractor: consistency is key".

# Challenge

Cybersecurity is a universal challenge:

**Personal data records stolen …**
**Trillions lost to cybercrime …**
**Ransomware attacks …**
**Security pressures continue to grow …**
**Skills shortage …**
**Too many tools …**

# Solution

Quorum's managed security practice, with Cyber One helps keep customers productive and secure, and their company data protected.

This removes the "distraction" often associated with security and allows employees and business to focus on their priorities.

# Outcome

Help customers proactively guard against threats, identify breaches and incidents using advanced analytics. Automating the response to threats and incidents enterprise-wide.

**A key goal of Cyber One is to helps customers streamline security service delivery and incident management across their entire digital estate.**

# Cyber One
