COROLAR VIRTUAL CARE (CVC) FOR THE POST-COVID ERA

A MICROSOFT TEAMS SOLUTION FOR VIRTUAL CARE CLINICS.

⊘ COROLAR

INTRODUCING CVC WITH MICROSOFT TEAMS

CVC ON MICROSOFT TEAMS IS A SOLUTION FOR HEALTHCARE ORGANIZATIONS TO SETUP VIRTUAL WALK-IN AND SCHEDULED VIRTUAL VISITS TO ED AND PRE-OP CLINICS.

Corolar Virtual Care (CVC) is a Microsoft Teams native solution for acute care providers to rapidly launch virtual clinics, integrated with their EHRs and scheduling systems.

CVC supports both walk-in and scheduled virtual sessions. CVC can be integrated with the organization's EHR (Meditech, Cerner, EPIC, etc.) via FHIR APIs or HL7 standards.

+ **SETUP VIRTUAL WALKIN CLINICS**
+ **INITIATE VIRTUAL APPOINTMENTS**
+ **SEND EMAIL AND TEXT NOTIFICATIONS**
+ **SETUP CARE PATHWAYS**
+ **ONBOARD NEW USERS**

FOR CLINICIANS

+ With CVC clinicians can join virtual consultation appointments and add additional participants as required
+ Clinicians get centralized access to patients in queue
+ View intake forms completed by patients in Microsoft Teams
+ Take clinical notes and check patient history

FOR CARE COORDINATORS AND ADMINS

+ Care coordinators can design intake forms for patient portal
+ Setup clinic types and configure care pathways by clinic types
+ Setup templates for email and text notifications
+ Configure clinician profile and configure associations with clinic types

FOR PATIENTS

+ Join virtual consultation appointment through Microsoft Teams
+ Complete intake forms on patient portal for virtual appointments
+ View list of services available on the portal and system requirements for virtual consultations

---

It's never too late to upgrade your virtual workplace.

Get in touch with Dapasoft today to find out how CVC and Microsoft Teams can make your life easier as you continue caring for patients.
