

# Let's upskill the workforce of the future, together

### The challenge

The pace of technological change demands new skills and a platform that applies them.

**79%** 

of CEOs are concerned about the availability of key skills. They want to close skill gaps, but outdated learning platforms and business tech can hold them back.

Source: PwC's 23rd Annual Global CEO Survey.

### **Our solution**

ProEdge is the first end-to-end workforce planning and upskilling solution that delivers value.

ProEdge helps accelerate clients' upskilling journeys, identify and close skill gaps, and keep organizations competitive by giving their people the skills they need to innovate and automate at scale. This powerful tool enables the enterprise to drive adoption and create a culture of continuous learning.

### Plan

Identify client skill gaps and help them close them with future skills forecasting, benchmarking and personalized learning paths that achieve organizational goals.

#### Learn

Build paths to success through personalized skill-building modules featuring Industry-leading content and opportunities for people to earn industry-recognized credentials.

#### **Create (Coming Soon)**

Empower people across an organization to learn how to create new digital assets, automate tasks with access to workbench space and sandbox environments.

#### **Share**

Scale the benefits of citizen-led innovation. People can share their digital assets and solutions in ways that drive efficiencies and deliver value across the enterprise.

ProEdge is a journey

Upskilling can feel overwhelming. ProEdge can guide clients every step of the way.

We'll help jumpstart the upskilling journey

We'll work with clients to take an inspired business leadership approach & identify the function-specific skills they need now and in the future.

Engaging experience helps drive adoption

We'll help build a culture of continuous learning that motivates people through gamification and opportunities to earn credentials.

Digital solutions that scale across teams

Access to a crowdsourced solution community allows citizen-built digital assets to scale performance across the enterprise.

### How ProEdge can deliver value to individuals and the enterprise

## Identify skill gaps and plan how to close them

### Help understand where you need to invest by...

- Assessing your organization's skills and identify critical skill gaps
- Forecasting skills for future success with Al-based marketplace insights
- Benchmarking yourself against companies both inside and outside of your industry
- Launching personalized learning plans to achieve organizational goals

## Project-based learning that tests your skills

### Apply learned skills in a testing ground that includes...

- Workbench space to practice new technical skill
- Easy access to "sandbox" environments (third-party software, tools, widgets)
- External validation of learners' skills that can enhance people's career profiles

### Personalized learning for roles of the future

### Invite your people to build skills with...

- Personalized learning pathways designed for accessibility and based on learner needs
- Over 100K on-demand learning assets from our industry-leading content providers
- Courses that culminate in 30+ industry leading credentials
- An engaging, fun environment with social features and gamification that drive adoption

## Citizen-led automation and innovation at scale

### Give your people the tools to become upskilling heroes who can...

- Build digital assets and solutions that scale across teams
- Reduce hours spent on repeatable tasks
- Spend more time enhancing quality
- Deliver even greater value
