

ignio™

Cognitive Procurement

A Virtual Procurement Analyst
for your Enterprise

ignio Cognitive Procurement is an AI-based analytics solution for Procure-to-Pay, that screens purchase transactions and identifies opportunities to save money and improve the effectiveness of procurement. Our vision is to provide every organization the ability to **Explore** its procurement behavior using data and identify where to focus its efforts, **Monitor** live transactions to detect and predict problems needing human attention, and **Intercept** such transactions through corrective and preventive actions.

Leaders in Procurement Organizations face an array of challenges to deliver perceptible value to business. They are always looking for ways to:

- **Reduce purchase price variance** and avoid spend leakage
- **Examine enterprise spends** and guide vendor selection & rationalization
- **Minimize human intervention** and reduce the cost of operations
- **Improve the overall purchase experience** across disconnected systems
- **Leverage novel techniques to analyze data** without relying on data scientists

PRICE VARIANCE ANALYSIS

Detects items driving price variance and recommends optimal prices to save money

DELAY ANALYSIS

Mines behavioral patterns that drives delays and recommends monitoring

DUPLICATE ANALYSIS

Detects duplicate invoices driving spend leakage and identifies saving potential

SPEND ANALYSIS

Provides a spend overview along multiple dimensions with meaningful insights

EXCEPTION ANALYSIS

Mines behavioral patterns driving process inefficiencies and recommends monitoring

MONITOR PURCHASE ORDERS

Monitors open purchase orders daily and highlights opportunities to save time and money

MONITOR INVOICES

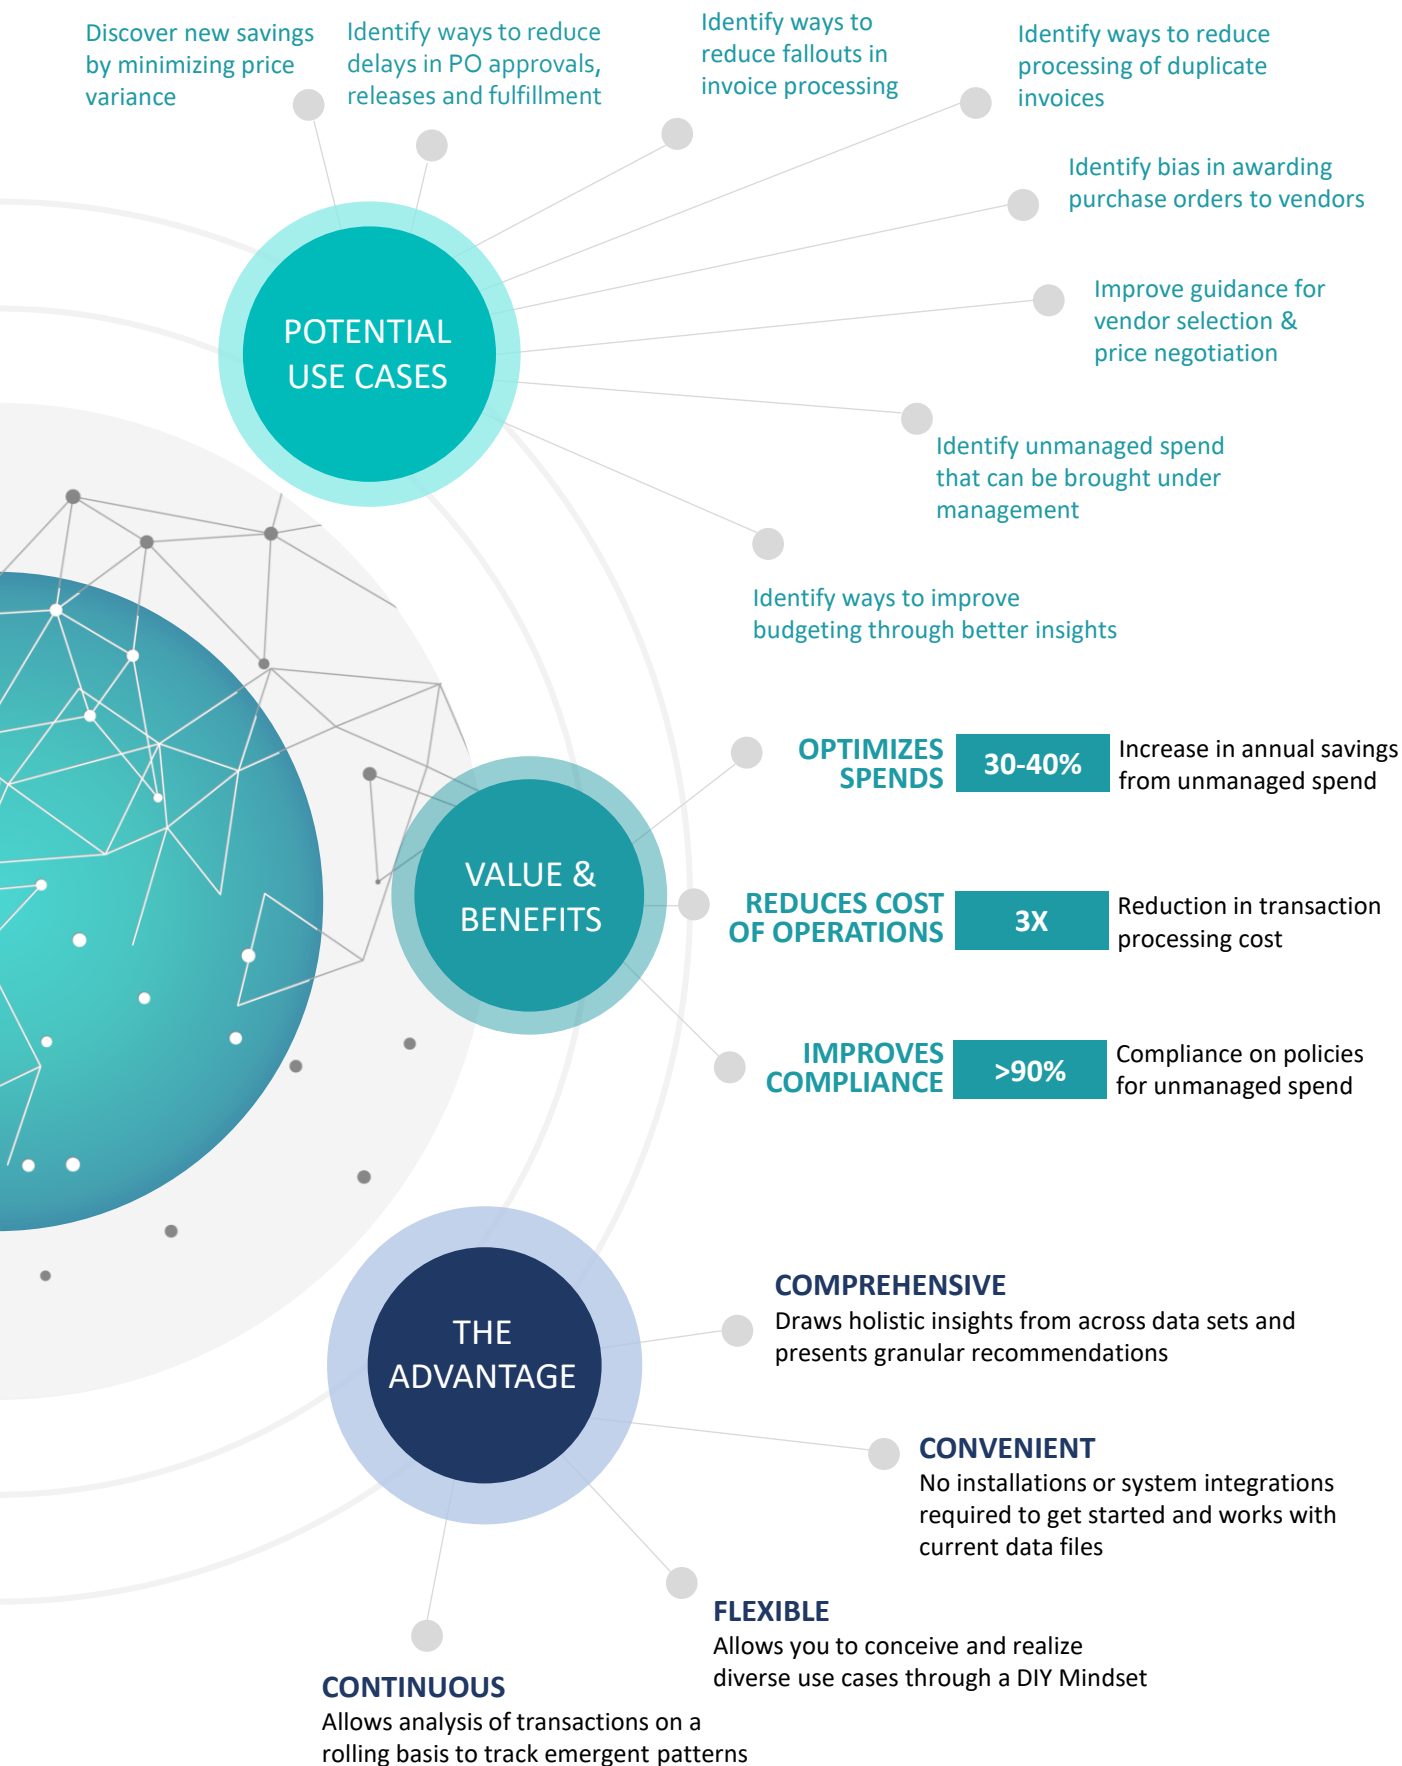

Monitors open Invoices daily and highlights to improve payout efficiency
