

SECURE YOUR EVERYTHING™

Harmony Connect

CHECK POINT SASE SOLUTION TO SECURELY CONNECT REMOTE USERS AND BRANCHES

ENTERPRISE CONNECTIVITY AND SECURITY NEEDS ARE EVOLVING

The enterprise perimeter has dissolved, with organizations moving from a concentrated, centralized IT model to a widely distributed one. Applications now reside everywhere, including traditional datacenters and cloud data centers (IaaS) or accessed as SaaS services like Office 365. Remote user connectivity is the new normal and branches are now bypassing data center security and connecting directly to the cloud.

HOW DO YOU SECURE THE HYPER-DISTRIBUTED ENTERPRISE?

This agility has significant implications:

- **Complex management** - Multiple point products lead to high operational overhead
- **Vast attack surface** - More users access corporate applications outside the traditional perimeter

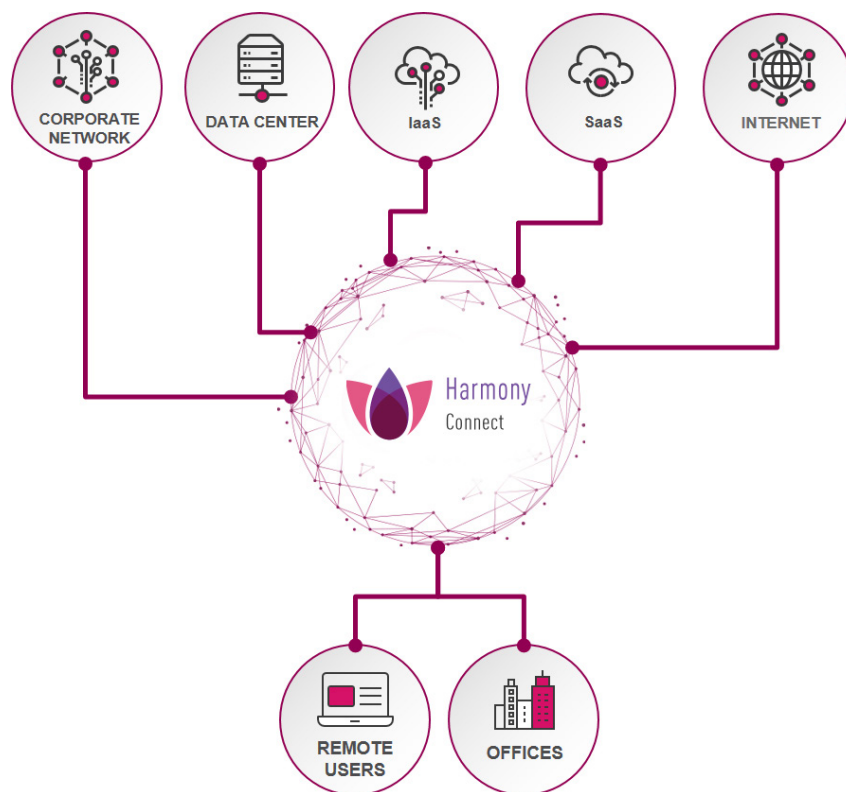

- **Fragmented Visibility** - Disparate solutions make it difficult to apply consistent policies across different services

HARMONY CONNECT – SECURELY CONNECT TO EVERYTHING

To secure the distributed enterprise, organizations need a Secure Access Service Edge (SASE) architecture.

Check Point Harmony Connect redefines SASE by making it **easy** to access to **corporate applications, SaaS and the internet** for any user or branch, from any device, without compromising on security.

Built to prevent the most advanced cyber attacks, Harmony Connect is a cloud-native service that unifies 11 security products, deploys within minutes and applies Zero Trust policies with a seamless user experience.

UNIFIED. BUILT TO PREVENT. USER-CENTRIC.

Agility and Advanced Threat Prevention are at the core of Harmony Connect:

SASE THAT'S BUILT TO PREVENT

- Unifies all critical SASE components, including networking and 11 security products to provide end to end security with Next Generation Firewall, Secure Web Gateway, advanced sandboxing and more!
- Zero Trust Network Access (ZTNA) to corporate applications, providing the right people in the right context, the least privileged access to applications, reducing your attack surface
- NSS top rated threat prevention, powered by 60 AI-driven security services
- Unique in-browser protection accelerates browsing while preventing malicious downloads and phishing

EASY TO DEPLOY & MANAGE

- Security administrators can easily deploy the solution in less than five minutes from the cloud
- Enhanced visibility including full audit trail of user activity
- Single-click branch office security, tightly integrated with leading SD-WAN services
- Cloud-based management provides unified policy control, coupled with global visibility into threats and user activity

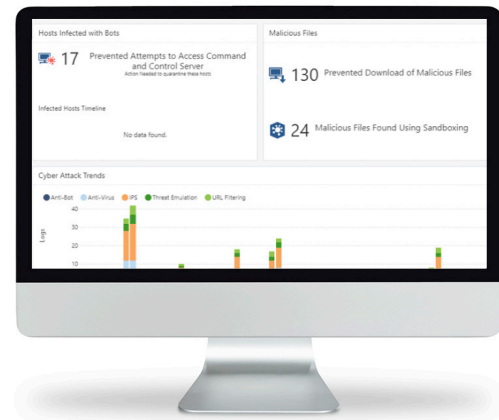

SECURE YOUR EVERYONE

- Choice of client-based and clientless connectivity to address a broad range of secure remote access use-cases
- Built-in single-sign-on and key management streamlines user access to internal applications
- Simple browser-based access to web applications, remote desktop and cloud servers, without requiring software installation
- Safest and fastest internet browsing for any user, on any device, whether managed or unmanaged
- High performance networking with less than 50ms latency and a 99.999% uptime SLA

WHY HARMONY CONNECT

Harmony Connect is unique in offering:

- NSS top-rated threat prevention
- ZTNA that deploys in 5 minutes
- Integrated email protection
- Powerful in-browser protection
- Less than 50 millisecond latency

Unified threat visibility

BENEFITS

- **Secure remote access** for any user or branch with seamless connectivity
- **Reduce operational overheads** with centralized management of 11 unified security services
- **Enforce Zero trust policies** for access to corporate networks, datacenters, IaaS, SaaS, and the internet
- **Prevent the most sophisticated attacks**, including zero-day malware and phishing
- **Consume security-as-a-service**
- **Leverage your current SD-WAN infrastructure**

INTEGRATES WITH LEADING SD-WAN PROVIDERS

Intuitive zero trust policy management for any user or app

Simple clientless remote access to any corporate app

DISCOVER HARMONY

Harmony Connect is part of the Check Point Harmony product suite, the industry's first unified security solution for users, devices and access. Harmony consolidates six products to provide uncompromised security and simplicity for everyone. It protects devices and internet connections from the most sophisticated attacks while ensuring Zero-Trust Access to corporate applications - all in a single solution that is easy to use, manage and buy.
