PREFECT

# The easiest way to automate your data.

Prefect is a dataflow automation tool that removes the headache of building and monitoring data science and data engineering workflows. It automates pipelines of any complexity and gives you complete visibility into the status of what's running and where issues may arise.

Powered by one of the fastest-growing open-source data projects, Prefect is trusted to run millions of data workflows. Advanced scheduling and notification features put your infrastructure on autopilot and frees your team from expensive negative engineering.

### Prefect Core

An open-source toolkit for building interactive data applications.

### Prefect Server

A self-hosted UI for active monitoring of Prefect workflows.

### Prefect Cloud

A complete automation platform for secure, highly available workflow management.

## What our customers are saying...

*"It is not easy to build something that is reliable in an unreliable world. Normally, it takes a team to deliver highly-reliable data pipelines with strict uptime SLAs. Prefect empowers a single engineer to do this 80% faster than a normal team. It's impressive and game-changing."*

**HUI ZHENG, SENIOR DATA ENGINEER, SEMIOS**

# The command center for your workflows.

Prefect's unique features give your team complete control while Prefect ensures instructions are followed perfectly. The patented hybrid execution model enables all the convenience of a SaaS product while keeping your code and data completely private and secure.

- Custom Scheduling
- Dynamic Workflows
- Authorization and Permissions
- Team management
- Realtime UI
- Logs Capture
- GraphQL API
- 99.9% Uptime
- Premiere Support
- Audit Trails
- Automation Suite
- Notifications and Alerts

## Why Prefect?

### Ease of Use

Up and running in under 5 minutes.

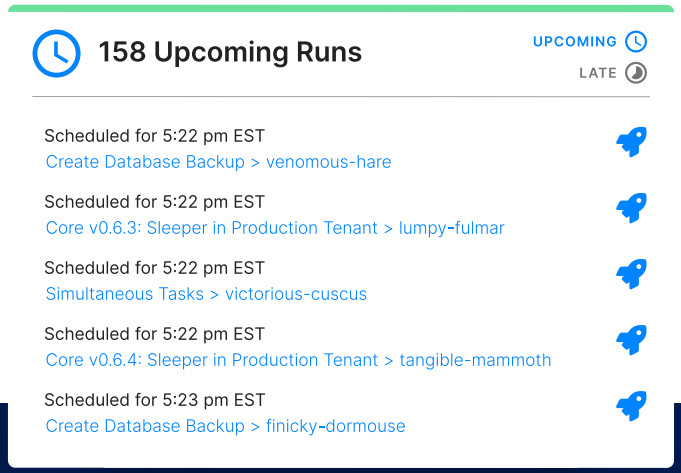

### Confidence

Total oversight of your data workflows.

### ROI

Recover valuable time and resources.

### Our Patented Hybrid Execution Model

Prefect's hybrid execution model keeps your code and data private while still taking full advantage of our managed workflow orchestration service.

It's so innovative, we patented it.
