

# **SPLASH** COLLECT

PRODUCT BROCHURE

## EXCEPTIONALLY ADVANCED COLLECTION APPLICATION.

**SplashCollect** is a collection application that reduces analysis time and increases the efficiency of debt collectors while optimizing collection operations and reducing internal costs.

**This way, companies will be able to:**

- 1.** Optimize their debt collection efforts;
- 2.** Quickly recover arrears from corporate customers, preventing the creation and increasing accounts payable;
- 3.** Identify debtors, create delinquency tickets, manage debtor accounts, track and complete the collection process.

Based on Dynamics 365 platform and integrated with Dynamics Portal Add-on, SplashCollect is easily accessible by via web or mobile.

# SPLASHCOLLECT. AN INVESTMENT THAT WILL BRING VISIBLE RESULTS.

## Reduced analysis time and increased efficiency of the collectors

SplashCollect includes an efficient ticketing system for identifying debtors, grouping them based on delinquency level and creating delinquency tickets. This system helps:

- 1** Track the activity flows associated with the current accounts, as well as the access to the entire history of past collection processes such as current status, completed steps, future step, debt amount, account owner or days past due.
- 2** Automate the collection processes by closing and opening delinquency tickets based on the occurrence of payments into the system and closing the invoices.
- 3** Coordinate and delegate the step execution, simultaneously or dependently, according to individual abilities, thus optimizing the work of each responsible for debt collection.
- 4** Simultaneously manage different processes and provide reports specialized on various processes.

## Optimized operational efforts and reduced internal costs

Our solution eliminates manual work needed for managing invoices and communicating with customers with debts - which both can be extremely expensive and time consuming. It also provides a centralized information database with customers, contracts, invoices, associated payments or advance payments, securities, calculated penalties, debts, as well as DPD (Days Past Due). A quick and consistent view on overdue accounts is provided, including information regarding the interaction with the customer, contact conclusion, account distribution or promised amount.

## Decreased customers' debts, optimized profit and increased cash flow

SplashCollect offers structured debt collection process, based on the specific needs of each organization. This approach decreases the value of DSO (Days Sales Outstanding) indicator by decreasing the average number of days needed to turn the debts into cash. Additionally, it generates a fast return of investment thanks to low cost of ownership and quick implementation.

# UNIQUE, FEATURE-RICH SOLUTION
