

# Azure Archiving

Retention and migration  
of legacy content into an Azure archive

**Ties to a legacy archive can be a barrier to cloud adoption and represent a significant overhead**

## A modern approach to archiving

Using a Microsoft Azure based archive platform means secure preservation of multiple workloads at a low cost, without sacrificing agility and control.

**Email | Voice calls | Files | Videos | Apps | SharePoint**

## The need to archive...

- Legacy Journals needing a suitable 'home' in the cloud
- Ongoing Journal requirement
- Storage efficiency for files, videos, voice calls
- Boost e-discovery capability
- Freedom from costly subscriptions to legacy 3<sup>rd</sup> party archive platforms
- Take advantage of Azure scalability and architecture
- No data lock-in
- A futureproof data platform

## Advisory on the best archive platform for business needs

- Technical consultancy
- Vendor agnostic approach
- Tech savvy compliance advise

✓ **Specialist migration partner**

## End to end archive migration

- Fixed price to agreed scope
- Proven migration methodology
- Fully managed service

✓ **SaaS migration platform in**

## Ongoing support and services

- Data preservation lake
- Optimize efficiency
- Execute e-discovery

✓ **Complexity and high volumes**

"The combined solution cost was significantly less than that of maintaining and working with the incumbent email archive platform. Importantly, the solution is enabling the company to deliver a much faster response to eDiscovery requests involving email"
