

# Mail Attachments Plus

Your Attachment APP for  
Microsoft Dynamics 365 Business Central

- Set unlimited amount of default attachments per report
- Unlimited amount of standard attachments per customer
- Unlimited amount of standard attachments per document
- Standard attachments limited to a specific time period

## Manage your attachments like a pro

Do you attach the same files over and over again? Just add them to the standard attachments. Standard attachments allow you to save time by setting up specific files to be sent whenever you send a particular report. This is especially useful for things like terms and conditions or advertisements. You will also see these available at the accounts receivable level.

We allow you to set standard attachments in a variety of places, per report, per document or per report. It is all possible with just a few clicks.

It is even possible to restrict certain attachments to a specific time frame.

The app supports all common file types

You can try the App for free to see if it fits your needs.

One user can always use the app and all its functions

You have the possibility to extend your free version with additional users at any time. Each license costs 0.90€/month and is billed either monthly, quarterly or annually.

Available on  
**Microsoft AppSource**

## Über uns

Sie finden bei uns smarte Lösungen, sowie intelligente und standardisierte Schnittstellen für papierintensive Prozesse.
