

Achieve productivity and accuracy improvements throughout your business and warehouse processes

If you are responsible for the operational aspects of the flow between the warehouse and the rest of your business, you will recognise these challenges :

“We need to improve the information flow between warehouse, procurement and finance.”

“We need the warehouse operators to quickly scan inventory in order to send back information to the back-office.”

“Quality management throughout the production and goods-in processes needs to be quick and easy.”

Why choose Prodware to support your production cycle needs in Dynamics 365 for Finance & Operations?

As a Microsoft partner, Prodware has developed and implemented Dynamics 365 and AX projects across Europe.

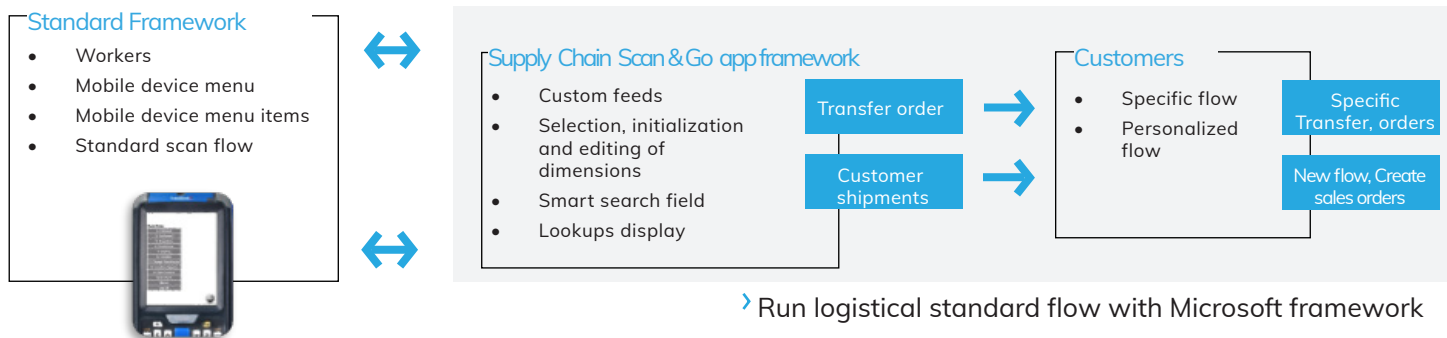

Our experienced R&D team work closely with our clients to develop additional functionalities that suit their stock management needs.

Supply Chain Scan & Go accelerator runs Dynamics 365 standard logistics feeds with the same technology. It includes processes such as:

- Customer shipments
- Receiving suppliers
- Stock transfers
- Preparation
- Delivery of products on production order
- Quality management throughout production and warehouse operations

Solution overview and process flows
