EMCS Spain | Excise Movement Control System

ABOUT TIPSA S.L.

Tipsa is a Spanish partner focused on Dynamics 365 Business Central that aims to help SMB companies to modernize their management, communication and collaboration systems with Microsoft cloud technologies, such as Dynamics 365 ecosystem, Power Platform and Microsoft 365.

WHAT WE OFFER

This application for Dynamics 365 Business Central is designed for wineries, cooperatives, cava, spirits, brandies, distilleries and other companies that produce and distribute alcoholic beverages with special taxes.
They must submit the accompanying documents to the Spanish Tax Agency following the European EMCS regulations.

This solution is built for being deployed as an extension (app) for Dynamics 365 Business Central (both on premise and cloud environments).

This solution works smoothly with all supported devices by Dynamics 365 Business Central.

You can use this app as a standalone or working together with other extension built in Dynamics 365 Business Central that you can get from AppSource Marketplace.

"Tipsa, with its new generation of applications, is among the innovators combining the potential of Dynamics 365, Microsoft 365 and Power Platform (Power BI, Power Automate, and Power Apps) to benefit their customers."

– Toby Bowers, General Manager, Business Applications Group at Microsoft Corp.

KEY USE CASES

EMCS Spain | Excise Movement Control System

This application for Dynamics 365 Business Central is designed for wineries, cooperatives, cava, spirits, brandies, distilleries and other companies that produce and distribute alcoholic beverages with special taxes. They must submit the accompanying documents to the Spanish Tax Agency following the European EMCS regulations (Excise Movement and Control System).

This app allows the connection with the IT services of the Treasury to obtain the ARC number; manage CAE (excise) numbers, consignees, dispatchers, establishments; generate e-DAA; access the messages processed by the AEAT and carry out multiple operations, such as shipments and receptions of merchandise; returns; transfers of goods; e-DAAs cancellations; changes of destination and places of delivery; explanations, or generate emergency documents.

WHY MICROSOFT DYNAMICS 365?

Modern applications that deliver new experiences and connect with businesses' existing systems to allow organization to digitally transform their own way. Connect to information from social networks, mobile devices and micro-applications to drive intelligence and inform a more effective business process.

Unified data and processes that enables business without silos. Centralized data enables disparate groups to work together effectively via a single, trusted view of processes, relationships, and data.
Data connectors allow thousands of systems to bring their data into a single network.

Intelligence that delivers actionable insight. Data in the new world includes social, relationship, and productivity information, in addition to insights generated by business systems. The right solution requires a unified approach that allows companies to automatically leverage their data to decide and act in real time with expanded analytics, predictive algorithms, and automated artificial intelligence.

An extensible environment that enables change. The right solution establishes a data, communication, and application environment that makes it easy to evolve and extend existing business operations.
