

Transforming Microsoft Teams Into Digital Workplace

Increasing Office365 and Teams Adoption

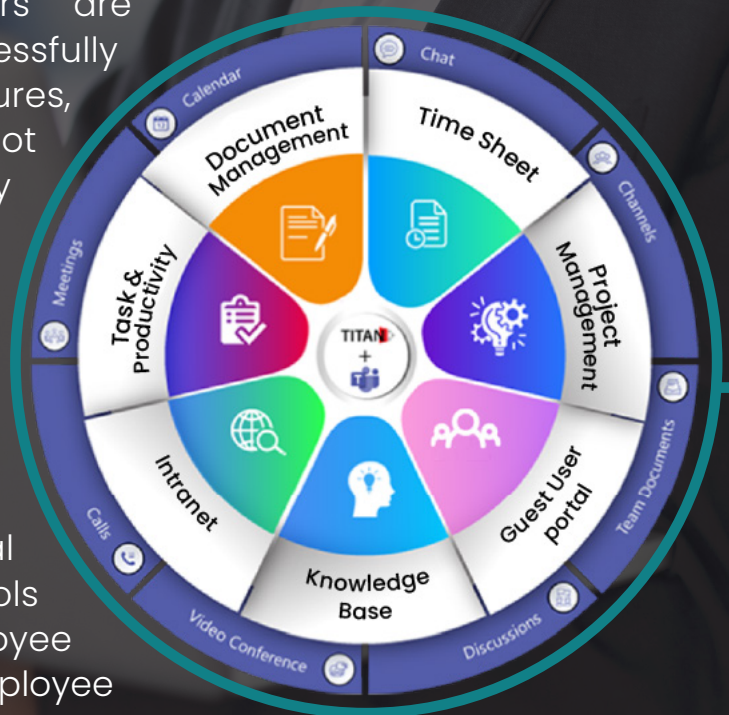

Light Up Your Office365

Quickly roll out collaborative features of M365 without any training or customization.

Titan is an Integrated App that leverages the power of SharePoint within Microsoft Teams to deliver very useful productivity tools.

What problem do we solve?

The majority of M365 customers are struggling to fully utilize M365. To successfully roll out these collaborative features, customers not only have to spend a lot for customization and training, they also have to invest in SharePoint and other technical skills for ongoing maintenance and support. This often results in lower-than-expected adoption for M365. Titan has simplified the important collaboration tools within M365 which can be rolled out quickly without any additional customization or training. Our tools within Titan focus on enhancing employee productivity and making employee engagement more robust.

BUSINESS BENEFITS

1

Improve internal communication and employee engagement.

Ready to rollout feature rich Intranet to manage News, Announcements, Surveys, Events, Q&A, Recognitions, Celebrations, Social Media feeds, Knowledge Base, Social connect and more.

Improve document control and security.

M365 offers great features for document management. Typically, it is extremely difficult for a business users to setup rights, permissions and learn SharePoint to setup their DMS properly. Titan provides users with a customized and ready to use document management system that delivers a DMS for all business users instantly.

2

3

Meet delivery objectives with better visibility into pending tasks.

Titan offers a comprehensive task management system that handles the entire task lifecycle. It manages individual, general, project or group tasks with an intuitive task dashboard that gives you full visibility of progress and delays.

Effective way to manage projects.

Titan provides a simple, yet more effective way to manage your projects by providing a consolidated view of project team, tasks, documents, and timesheets. Titan provides a streamlined way to manage projects allowing greater employee adoption. Most employees do not require the complexity of dedicated project tools, nor can they effectively operate.

4

5

Improve productivity of the remote workforce.

It creates a central repository of knowledge that makes it easy for remote workers to access the right information 24x7. This saves a significant amount of unproductive time that is generally consumed to find information. Timesheets can be captured against tasks to analyze resource consumption.

Extend guest user portals to your customers, vendors, temp. workers, consultants.

Titan also allows you to setup a dedicated guest user portal for your external users such as Customers, Partners, Vendors, Consultants, Students etc. You can share documents, assign tasks, add them to your projects as team members, track progress, communicate, share news, gather opinions, track attendance, and monitor timesheets.

6

Adding more power to Microsoft Teams

Set-up Guest User Portal

Does not consume M365 license for Non-Active Directory users

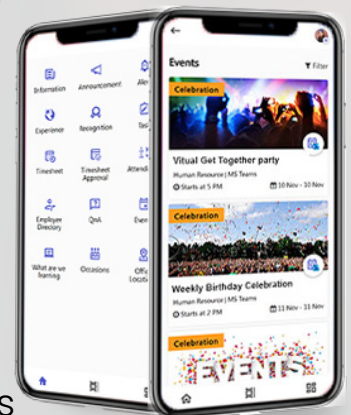

A Revolutionary Modern Workplace within Microsoft Teams
