FORMATIVE ASSESSMENT TRAINING
THE NEW ONLINE EDUCATION

Pedagoo facilitates learning, evaluates knowledge, and increases productivity.

The platform allows the creation of personalized questions to evaluate all kinds of skills and obtain immediate results.

Companies and corporate training

Transform your organization

Committing to corporate training and implement a continuous learning routine in your organization will help reduce the time your team needs to assume change.

Increment staff productivity

Pedagoo helps to reduce the time the training manager needs to create and distribute the assessments, track progress, and generate results reports.

Absolute control of the whole training process

Your managers can monitor both the progress and the performance of the employees. This allows you to shape the training process to optimize deadlines and investment.
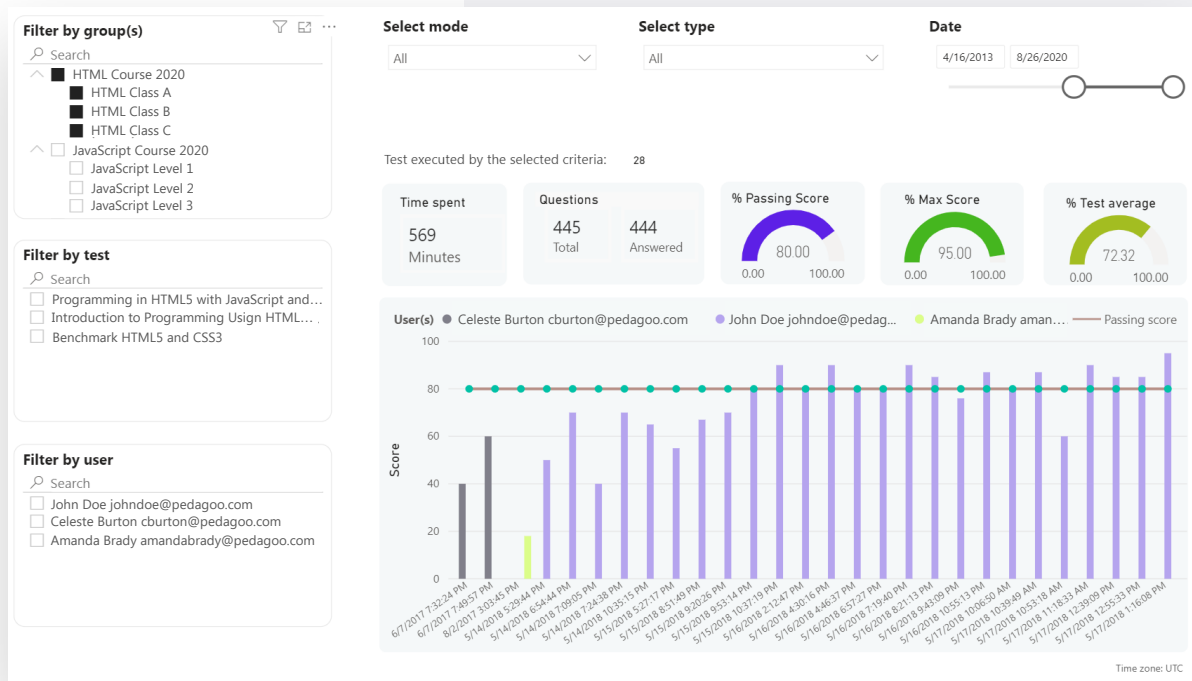

Commit to practical learning

Practicing on simulated or even in real environments brings practical learning to its highest level and flattens the learning curve. Pedagoo supports software simulation exercises to favor this kind of learning.

Companies and corporate training

Progress reports

Monitor the progress of learning programs through reports, filtered by students, student groups or tests.

Certification bodies

Create your official practice tests

Create your own practical tests to help and prepare the candidates for the exam day, increasing their confidence.
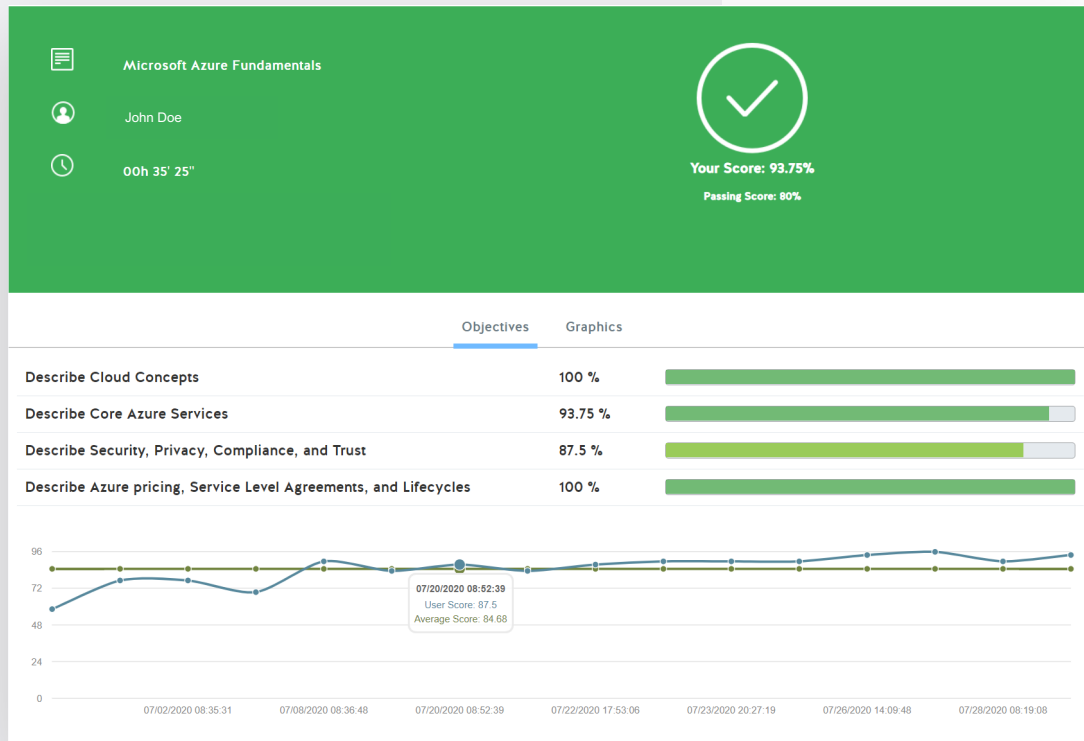

Increased success rate among students

Pedagoo can increase a candidate's confidence toward exam day with an intuitive methodology and a technology that allows them to practice in an exam-like environment.

Validate before certifying

Prepare your candidates using your own official practice tests, helping them pass the certification exam, increasing their chances of finding a job and the reputation of your certification.

Never alone on the learning journey

During preparation, candidates can monitor their progress to detect weaker areas and focus only on them.

Certification bodies

Increase confidence

Increase a candidate's confidence with the experience and knowledge acquired during practical learning, allowing them to get familiar with the real official exam.

Education

From paper to digital

Pedagoo helps you
transform your learning institution by
moving questions and evaluations from
paper to digital.

Teaching staff can share questions or
evaluations and analyze results in class.

Improved skills and knowledge

Successfully evaluate candidates, students or staff by
creating personalized questions, or by using the more
than 18,000 existing questions available in the
MeasureUp® catalog. MeasureUp® is a global leader in the
creation of practice tests for the IT sector.

Bring your evaluation to digital

Not only will you contribute to preserving the environment,
but you will also save time, because the platform will grade every
question at the end of the test.

Monitor your student's progress

Know how long each student devotes to practical lessons, their
performance, weaker areas, and many other indicators that will
help you improve your student's learning experience.

Standardize evaluations

Pedagoo reports let you to monitor which teaching centers,
subjects or teachers obtain better results, allowing you
to analyze the context and use them as models to be replicated
in the rest of your learning institution.

Education

Real time

Monitor the detailed progress of practice tests and exercises that students do in real time.

Human Resources

Optimize the hiring process

Improve your hiring process and assess your candidates' technical knowledge by using your own questions or combining them with the more than 18,000 existing questions in the MeasureUp® catalog.

Reduce assessment time for staff or new hires

Rapidly evaluate complex technical abilities with a database of questions, written by subject matter experts, that cover a wide range of technological competencies.

Objective assessments

Understand the abilities and knowledge of your candidates with detailed information based on the results of your own assessments.

Reduce costs

Design candidate-oriented evaluations adapted to the roles your organization needs. Reduce interview time by simultaneously launching different technical tests, even remotely.

My Account

Your organization will be as big as you want it to be

This tool allows you to customize the management of your own account, the registration and modification of users, the creation of the organization's structure, as well as the validation and editing of the different roles.

The Pedagoo My Account tool allows you to create a structure that progressively adapts to your needs without any growth limits.

Manage your own account

Edit your personal data and configure your user profile, as well as the display and delivery options of your practice tests or assessments in order to fully customize your user experience.

Create or modify roles

Add roles from the profiles already predefined in Pedagoo, or create your own roles, assigning different permissions and functionalities to each of them, in order to suit your own working method.

Quickly add or edit users

Pedagoo has a user account validation system. As an administrator of your organization, you can register many users in batches, and they will receive an email to validate the activation of their user accounts in the system in a secure way.

My Account

Organize your distribution network

You can transfer the entire structure of your training centers, academies, company or sales network to My Account and thus be able to distribute your generated content with our authoring or third-party tools to this entire distribution network.

Authoring Tool

The best ally for content creators

A tool designed to help you create assessment and practice tests easily, without any need for technical knowledge.

Authoring Tool is used by the creators of the official practice tests for some of the world's leading software companies, and it is now at your disposal. You can easily create, manage and store content for digital evaluations of any subject matter and any level.

Wide range of question types

Often questions are not answered with a simple Yes or No. Authoring Tool has a wide variety of question types and is easily adapted to the requirements of your specific evaluation.

Custom workflows

You don't need to adapt your working method to the tool, the tool will adapt to your method and workflows. You can define the content creation workflow within the Authoring Tool that is uniquely suited for your organization and decide which roles are involved in each step of the process.

Organize and publish your own tests

Organize your content efficiently, create filters or search parameters to manage your content and publish them for distribution with a single click.

Authoring Tool

Create your own questions

Create your own interactive questions using a tool with an interface specifically designed for content creators. The content creation with this tool is easy and it doesn't require any previous knowledge.

A⁺ Assessment Builder

Complete evaluation tests

This tool allows you to easily create assessments for your team, candidates or students. In just a few clicks you can have a custom assessment, which will help you to evaluate any subject matter.

Pedagoo provides you with access to the extensive database of questions from MeasureUp®, one of the world leaders in creating IT assessments and practice tests. You can combine your own questions with the catalog to create custom assessments adapted to your needs.

Flexible assessment creation

Use your own content database that is properly labeled by subject, question type, or degree of difficulty, among others, to create custom tests by combining all the questions you've created in the system, regardless of category or publisher.

Random or fixed?

As part of the process of creating your custom assessment, you can choose whether you want the questions to be displayed randomly or whether you prefer to arrange them in a specific order for all your students and all releases.

Combine MeasureUp® content with your own questions

If you can't find the question you need among the database of 18,000 IT pro questions available, you can add questions of your own and mix them with the existing ones.

Assessment Builder

Customize your assessments

The Assessment Builder lets you create individualized assessment tests that you can use to validate your students' knowledge on a day-to-day basis. Use all published existing tests and questions to get the most out of this functionality.

Partner Portal

Manage and distribute your content

A management portal for content capable of generating user groups, detailed and accurate reports on the consumption of its content, and keys to use the different tests created, among other things.

The Partner Portal allows you to distribute the content created with our authoring tool to your distribution network. This allows you to accurately monitor the evolution of your learning processes.

Use your published content

Once you have created your own practice tests or evaluations, you can configure them so that they are available throughout your distribution network. You can generate the necessary licenses to cover all your demand.

Create and manage groups

Establish groups/classes according to your organizational criteria. You can generate sectorized reports for each defined group or compare the progress among several of them.

Reports

Partner Portal is especially suitable for analyzing different types of reports through PowerBI, ranging from a progress report on your students, a specific test or class, to a sales report on one of your distributors.

Partner Portal

Manage license usage

Assign a specific number of licenses to your own distribution network in a personalized way, such as a center, a retailer, or an end customer. These in turn can self-manage the licenses according to their needs.

Learning Locker

Use the tests assigned to your users

The platform for the provision, consumption, control, and management of services provided to end users.

With its intuitive and adaptable design, and through our various clients, Pedagoo has become the online assessment platform of choice for thousands of users to help them successfully complete their training plans.

For those who are preparing

The practice tests that are launched from the Learning Locker have multiple options that allow you to adapt to each student's needs. Among other things, they can be configured to change the order of the questions, to only ask for a specific objective, or to only ask questions that the student got wrong in previous attempts.

Prepared to take the exam?

No more jumping without a net. The practice tests that are launched from the Learning Locker also have an Exam Mode that simulates in detail a real evaluation exam. In this way, your students will be able to know if they are ready to face the real exam and be successful.

Controlled progress at all times

By accessing their history, your students will be able to see all the reports generated in all of the tests taken.

Learning Locker

Custom Assessments

In addition to the assessments that can be distributed directly with the Assessment Builder tool, students who have a Practice Test can easily and quickly make a personalized evaluation for themselves based on the practice test questions that you have assigned them.

MeasureUp® Catalog

The best content at your fingertips

MeasureUp® is the world's leading provider of certification practice tests and assessments for IT professionals.

The MeasureUp® Catalog, official provider of practice tests for the preparation of Microsoft ICT certification exams, and provider of tests for Amazon Web Services, Oracle, Project Management Institute, Cisco, VMware and CompTIA, has more than 190 titles available and 18,000 questions at your disposal with a single click.

More than 190 titles

Created by experts in each of the technologies that are used, commercializing more than a million practical tests in the last five years.

Create ICT assessments effortlessly

The MeasureUp® database is available to our clients, with more than 18,000 updated questions that follow the exam objectives of all official certifications from Microsoft, Cisco, CompTIA and VMware, among others.

Content aligned with official certification

All the content that you have available in MeasureUp® is aligned with each of the official certifications of the different vendors. Stop worrying about creating your own content and use the best content available online to assess ICT knowledge.

MeasureUp® Catalog

Flexible and powerful

If you decide to use MeasureUp®
content in your practice tests and
evaluations, you can decide if
you want to use only one question or if
you prefer to use up to 150 questions
per test, mixing all the available tests
that MeasureUp has. You will only pay
for what you use.

The safety of a giant

Pedagoo works with Microsoft Azure's multilayer security to guarantee the protection of all data stored on the platform.

Threat protection and safe traffic

It offers a high level of defense due to its ability to not only detect threats but to also help protect from them. It raises alerts of threats in its surroundings, such as brute force attacks through Remote Desktop Protocol (RDP) or SQL injection.

Maximum speed

Thanks to the Azure Synapse Link technology, requests to obtain information from its dynamic operational data stores are carried out in almost real time.

Periodic safety reviews

Artificial intelligence (AI) used to detect and respond to threats smarter and faster. Detect threats before they cause damage, with reinvented SIEM technology.

ISO 20.000 Certified

Pedagoo is certified to give quicker, safer, and more transparent responses.

It has the facility to align with other standards that facilitate the work in organizations for the implementation of integrated systems

Defined processes

Our platform has the necessary procedures and controls to provide a coherent and effective high-quality IT service.

Planning and deployment of services

Alignment between the latest technology and Pedagoo services to offer our clients a better experience in a responsible way.

Constant improvement

With this certification, Pedagoo is working to improve the efficiency, reliability, and consistency of its IT services.

Dynamic and fast

Our processes allow us to easily adapt to changes and respond more quickly to demands. Services are streamlined, increasing skill and speed with the processes that are performed.
