

Calico Cloud

Pay-as-you-go SaaS platform for Kubernetes Security and Observability

Calico Cloud is a pay-as-you-go managed service to deploy a standard set of egress access controls, enforce security policies consistently, ensure compliance, get end-to-end observability, and troubleshoot applications across multi-cluster and multi-cloud Kubernetes environments. It scales automatically with managed clusters to ensure security, continuous compliance, and uninterrupted real-time observability.

With Calico Cloud, users get Kubernetes security and observability as-a-service in a usage-based pricing model and only pay for the services consumed. The service is up and running within minutes and works with any Kubernetes distribution across any cloud.

How to get started with Calico Cloud?

Users can start with a 14-day free trial and then select from one of the offerings based on their needs:

	Starter	Pro
<i>*Available in Pro Only</i>		
Egress Access Controls		
<ul style="list-style-type: none"> DNS Policy Egress Gateway AWS Security Group Integration 	Yes	Yes
