How do you integrate VisitorLAB into your website?

Created October 4, 2019 | Author visitorlab | Category Installation

You can integrate your website with VisitorLAB in less than 3 minutes and you can start using;

- Visitor Recording
- Heatmap
- Error Tracking

After creating your account at http://app.visitorlab.com/register and adding the domain of the website you want to track visitor movements, you need to add the script code we created to your website. That's all you have to do – then you can review the results as you wish as your data accumulates.

visitor LÂI	Tracking Code * To install VisitorLAB, you need to copy the following script to the end of the (body) section of each web page you want to record.	, Upgrode A Account
Main Dashbo	<pre>cl VISITORIAB> (script type="text/javascript"></pre>	Add Website
website 1 https://ww October 312	<pre>(function(d,p,c,a,m,u,r) { d.vl=a(u,r), {</pre>	ACTION
2 http://myc April 30 2019 3 http://app. May 09 2019	Once the tracking code is installed, visit your website to verify that your visit is being recorded.
