

# ACCELERATE YOUR CROSS-ORG COLLABORATION WITH CONFIDENCE & EASE

Create unified address lists across organizations & extend centralized services to partner organizations without standing up your own infrastructure or engaging in complex implementations.

## What is CloudConnect?

### Your Solution for Secure & Successful Cross-Org Collaboration:

CloudConnect is a service designed by Forsyte I.T. Solutions to accelerate cross-organization collaboration by providing cross platform address book synchronization & Azure guest account management. Organizations of all sizes can effectively manage address list synchronizations & guest accounts in a simple & easy to use interface.

### Experience the Benefits of CloudConnect:

- ✓ Provides a unified address list across organizations & platforms (Office 365, G Suite, Exchange)
- ✓ Create Azure B2B accounts en-masse sourced from an Office 365 or G Suite tenants
- ✓ Extend Azure B2B account access to on-prem AD
- ✓ Enables synchronization in minutes, not weeks

CloudConnect provides a richer collaboration experience across tools such as Microsoft Teams & makes it easy to quickly access the data you need. The product supports multiple platforms & provides an automated method to access internal resources for external organizations & global address list synchronization.

- Cross-Org Collaboration
- Richer App Experience
- Minimal Setup

- Guest Account Mgmt
- Identity Mobility
- Azure AD Advanced Security

CloudConnect provides a richer collaboration experience across tools such as Microsoft Teams & makes it easy to quickly access the data you need.

Collaboration made simple.
