

Product description: CyberGate SIP to Teams

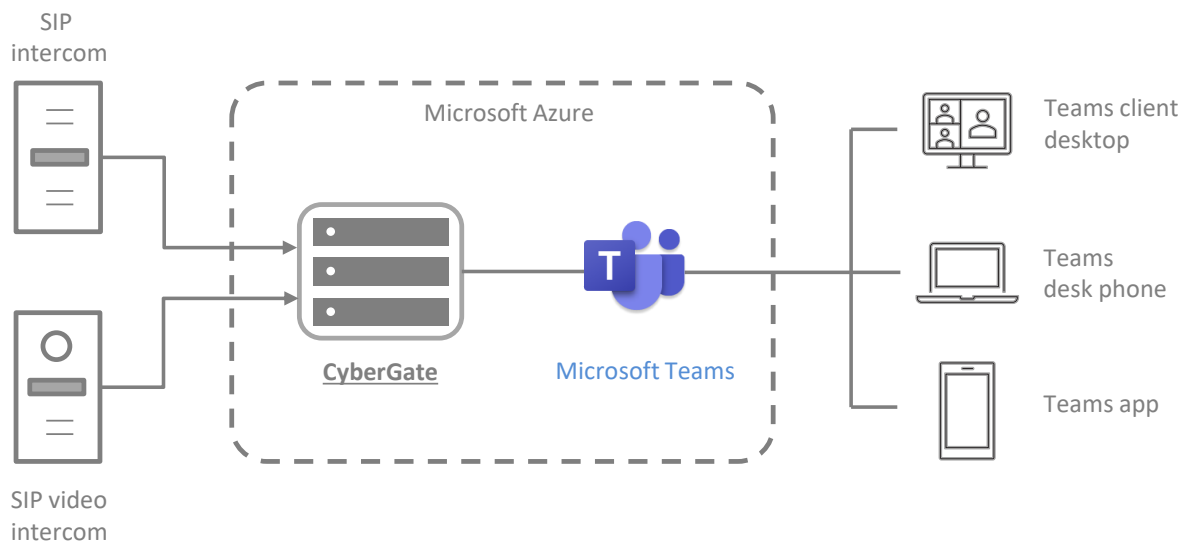

CyberGate

Microsoft Teams is the hub for teamwork in Microsoft 365. The Teams service enables instant messaging, audio and video calling, rich online meetings, mobile experiences, and extensive web conferencing capabilities. In addition, Teams provides file and data collaboration and extensibility features, and integrates with Microsoft 365 and other Microsoft and partner apps. According to Microsoft, Teams reached 145 million Daily Active Users in April 2021 (*1).

As Enterprises migrate their traditional telephony service from a local IP-PBX or Cloud Telephony platform to Microsoft Teams, they need a solution for the existing SIP (video) door intercoms to communicate with Teams.

Via **CyberGate** you can now connect your SIP audio- and SIP video door intercom to Microsoft Teams. Teams Users can answer incoming calls from the (video) door station – **with 2-way audio and live video** – on their Teams desktop client, Teams compatible desk phone and Teams Smartphone app and open the door for visitors.

The new **multi-ring** feature in **CyberGate** enables the Teams administrator to configure a group of Teams Users who will be notified simultaneously if someone rings the door station and the 1st responder will be connected to the visitor.

CyberGate Compatibility List

Product description: CyberGate SIP to Teams

Features

- Two-way audio and **live video** to the Teams desktop client, Teams compatible desk phone, and Teams app on your Smartphone.
- Opening a door or gate using the Teams Dialpad.
- Call individual Teams users or configure group names to call multiple users simultaneously.
- Disable Forwarding to prevent the intercom call to end up in a Voicemail box.

Where to buy

- CyberGate is a subscription based SaaS application that runs in Azure.
- Subscriptions can be purchased & activated online via [Microsoft Azure Marketplace](#) or [Microsoft AppSource](#) and come with a one month Free Trial period.
- For each Tenant, one subscription is required with 1 “user” for each door station.

Note:

- CyberGate does not work towards Teams Call Queues.

Robin ProLine & SmartView video intercom for Teams

For customers who do not have a Robin SIP audio- or video intercom, and (planning) to migrate to Microsoft Teams, the new [ProLine for Teams](#) series of video intercoms is available at a discounted price level.

The ProLine for Teams series do not support SIP registration to a local- or cloud based VoIP telephony platform. This product line only works in combination with a CyberGate subscription.

Robin distributors and resellers can offer the 'ProLine for Teams' video Intercom hardware. The End User - owner of the Teams Tenant – is the one to purchase & activate the CyberGate subscription via Microsoft AppSource or Microsoft Marketplace.

ProLine Video for Teams	ProLine Compact for Teams
(C05000, C05002, C05004, C05008)	(C05025, C05026, C05027) (surface mount only)
SmartView for Teams	
(C05050)

Remarks

- ➔ Currently it is not possible for Microsoft CSPs to purchase & activate CyberGate on behalf of their Teams clients. The End User (= organization with O365 and Teams subscriptions from Microsoft) should login to AppSource or Marketplace to source and activate CyberGate.
- ➔ During the purchase & activation process, you will be redirected to the CyberGate Management Portal to configure and activate the CyberGate subscription.
- ➔ Multi-ring can be configured via the CyberGate Management Portal.
