

Build an organized, accessible, and connected operations

Say goodbye to phone calls, emails, and paper forms and switch to automated workflows – no coding required!

Boost profitability through tighter control of maintenance work & costs

Reduce downtimes, get higher visibility on workloads and costs, and automate data gathering and analysis through Steer's MRO Suite

Streamlined Cost Tracking

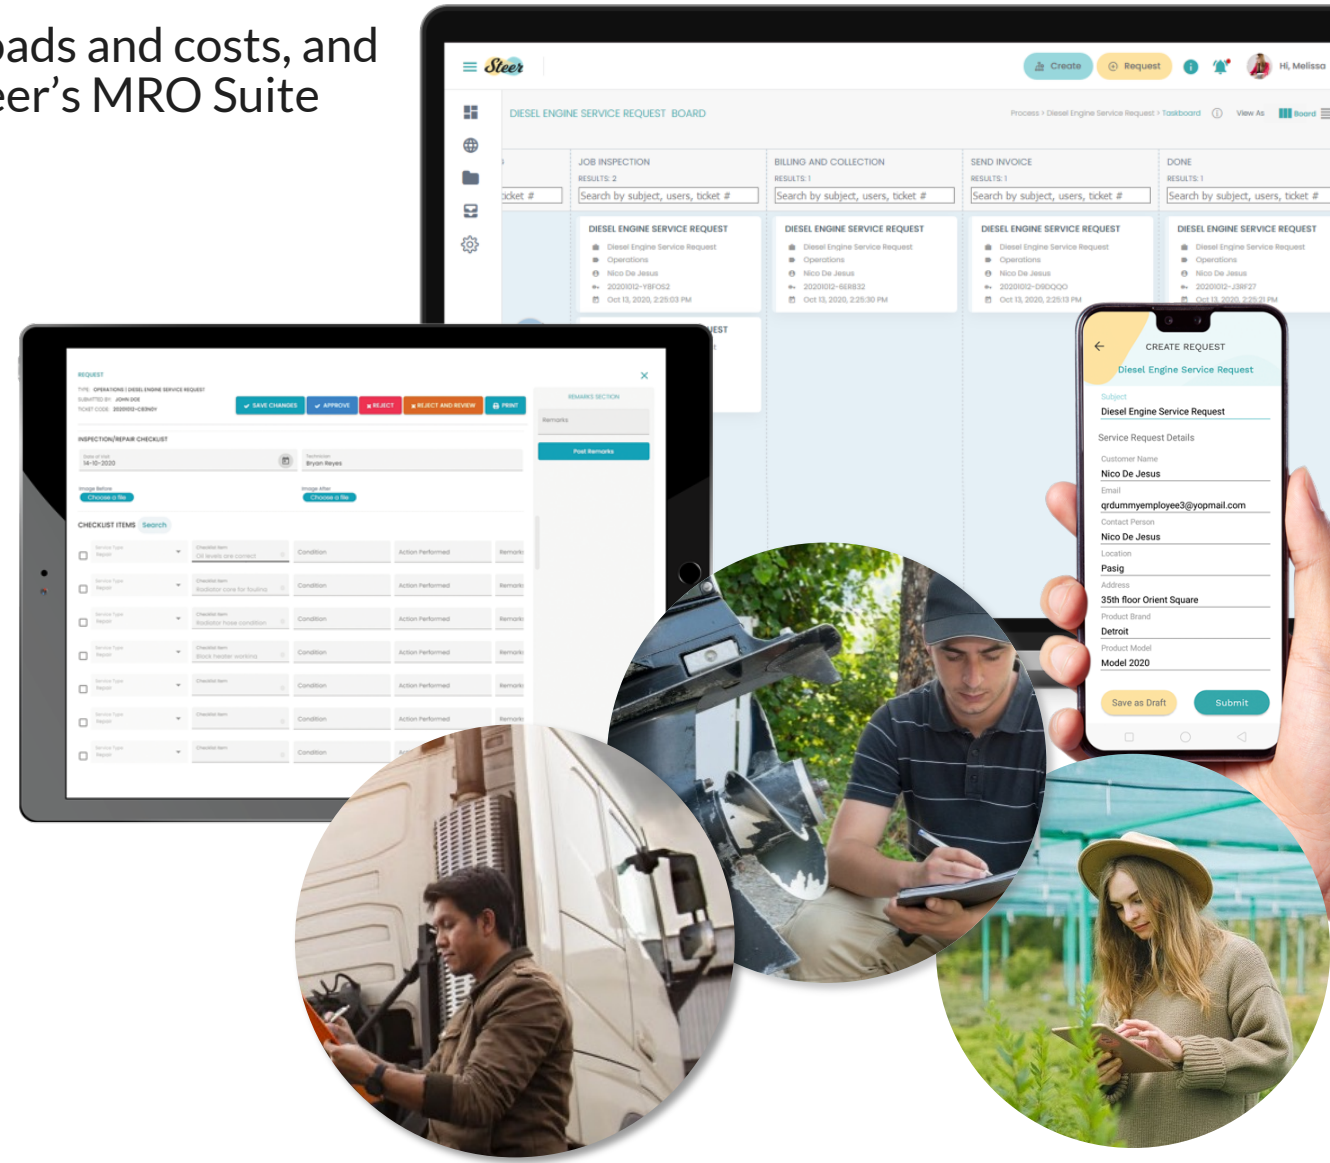

Manage project costs related to each work order such as labor, parts, & equipment used

Mobility & Self-Service

Provide technicians & managers mobile tools to manage work in the field and on the shop floor

Proactive Maintenance

Continuously collect & analyze large amounts of data and automatically trigger repair work

Maintenance management that fits your operations like a glove

Traditional Computerized Maintenance Management Systems (CMMS) or Enterprise Asset Management (EAM) software doesn't work for your unique processes, Steer is here to change all that

TOP SOLUTIONS TEMPLATES & FEATURES

Work Order Management

Record maintenance and repair work orders from various sources and track the progress and inputs for each job such as labor and equipment

Inventory Management

Track all MRO inventory and parts across assets and service teams -from releasing to technicians to actual usage - and control project costs

Preventive Maintenance

See asset history and schedule periodic or at-need inspections & maintenance work to ensure critical assets are performing at optimal levels

AI Predictive Maintenance

Monitor data gathered manually or automatically via Internet of Things and use artificial intelligence to preemptively trigger maintenance work

Dashboards & Reports

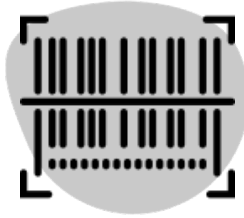

Generate actionable insights from data generated across the organization through dashboards and reports customizable via drag- and drop

Requisition & Procurement

Streamline processes surrounding replenishing stocks and sourcing for your MRO inventory, from team members requesting to managers' approval

**100% customizable -
no coding required!**

Other Features of the MRO Suite

BARCODE/QR CODE SCANNING

Enable smart scanning of barcodes or QR codes directly from the staff's mobile app and improve tracing of parts and consumables

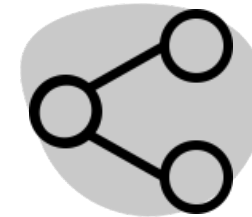

E-SIGNATURE

Provide process approvers (quality inspectors, managers) and even customers sign off work completion directly on a smartphone or tablet

PHOTO UPLOADS

Enable technicians to upload photos via their smartphone to get a better idea of the current status of the job at hand

INTEGRATION WITH CORE SYSTEMS

Connect Steer to your core systems like Accounting, ERP, and legacy CMMS/EAM software to eliminate manually porting data from Steer

Steer's MRO Suite is ideal for a myriad of industries, whether you're managing an internal maintenance team or a 3rd-party service provider

CASE STUDY

Significant Improvement of Operations Control & Self-Service Digitalization of Operations

Goals:

- Real-time tracking of project cost components including man-hours, equipment use, spare parts & consumables used
- Analysis of past project data to help with improved accuracy in job estimation and proposal

Challenges:

- After a failed ERP implementation effort, APM was eager to have a view of costs and profitability on a per-job & per-customer basis & improve management control over the operations

Solution:

- Steer assisted implementation of Project Cost Management solution & training of APM team to build their own solutions

Results:

- End to end project estimation, tracking and analysis for improvement
- Currently building their own set of 10+ other digital solutions from HR, Procurement, Field Service, and Finance

Created by a leading software engineering company

Gold Application Development
Silver Application Development
Silver Cloud Platform

Established in 2001, BlastAsia is one of the largest software product engineering companies in the Philippines. Drawing from almost two decades of building commercial software for independent software vendors from all over the world, as well as a decade of developing its own startups,

BlastAsia has built the no-code development platform Steer to help companies create transformative digital solutions without writing a single line of code.

BlastAsia is a Microsoft Gold Partner for Application Development and Cloud Platform.
