

## A Virtual Assistant for Ophthalmologists, Opticians, Eye Care Centers and Clinics

If you are an ophthalmologist or optician searching for a reliable virtual tool that will help you practice your profession quickly, with security and flexibility, then iMentor is just the app for you!

iMentor is a thoroughly designed application that assists you in digitally managing your patient files, appointments, reminders and even reports and statistics, all by using the application. By collaborating with experts in the field, we have ensured that the application completely covers the needs of every independent optician or ophthalmologist, every eye care center, clinic as well as optical store.

Every bit of your data is registered in an online database (also known as cloud), giving you the opportunity to have access to it through your desktop, smartphone or any other mobile device, from wherever you are.

**iMentor** can guarantee to make your job easier and more effective, while simultaneously providing you security.

### What **iMentor** will offer you ?

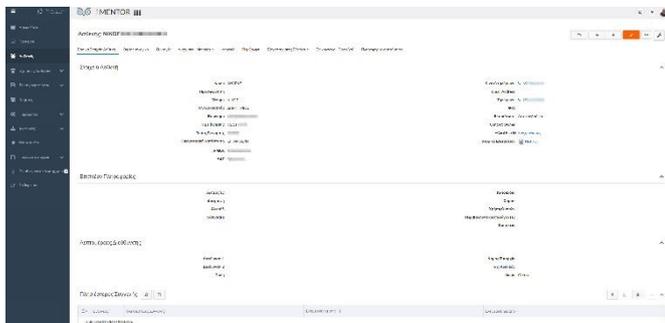

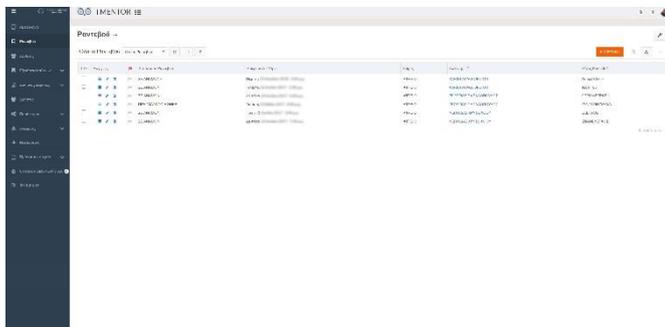

It's a well-known fact that running a modern eye care center/clinic requires high cost state-of-the-art equipment that results in investing large amounts of money. However, even when all the amenities of a clinic are well preserved and work properly, managing the operation of the clinic itself, may still cost in money and time.

## Features

- Create and manage the files of every one of your patients, including all of their information (prescriptions, medical history, treatments, surgeries etc.)
- Manage appointments and reminders on your calendar
- Contact your patients easily via SMS or e-mail
- Keep in contact through secure channels and encrypt data
- Create reports, tables, charts and statistics
- Available for a single user or multiple users with different roles and access rights

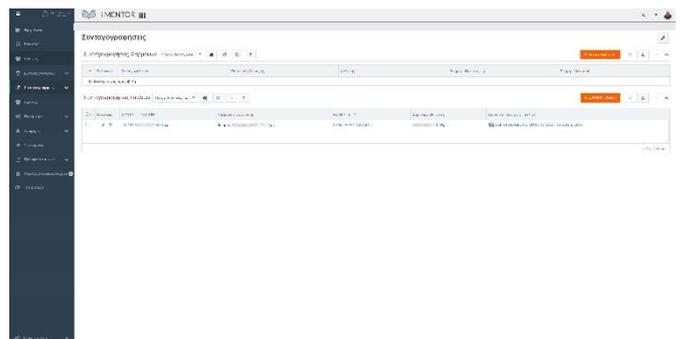

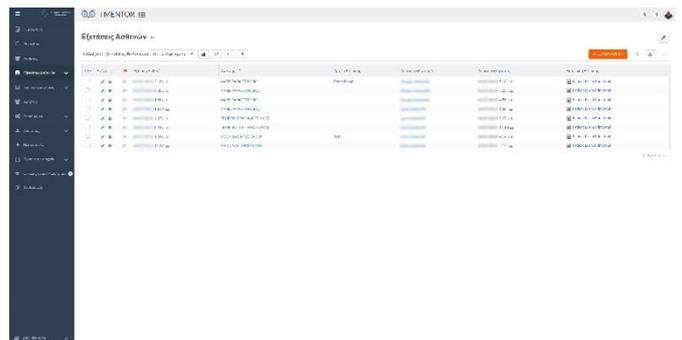

### Support includes:

- Integrating the application on your website or software
- Accessing new features and characteristics through upgrades and updates

## Benefits of using iMentor

- Store all your data in one system and manage it easily through the application
- Ensure the security of your files
- Have access to all your information 24/7, wherever you are- since it's hosted in cloud servers
- No need for more hardware- just use your internet connection
- Thorough but easy to use
- Ability to customize the application so that it fits your needs
- Allows mass data input and can be connected to external databases
- Connect with colleagues, trade data and give them access to your information
- Search through your files using tags and other criteria

## Security and Authentication

iMentor ensures the safety of your files by providing you multiple, flexible levels of authentication, that give you the opportunity to control how users access information and how they are recognized. All web pages benefit from Secure Sockets Layer (SSL) and Hyper Text Transfer Protocol Secure (HTTPS) for complete security. Other security features include: Single Sign-On, LDAP, Password Expiration Policies and IP Whitelists, which enable the administrator to control application access with incredible precision.
