COMPANY

TOP MANAGEMENT

- ▶ Genius ERP delivers real time visibility across your whole company, empowering your key staff to make better decisions
- ▶ Leverage more than 100 built-in metrics and KPIs, plus a custom report tool-kit, to improve the performance of your team

ACCOUNTING

- ▶ Genius Accounting is a full-feature multi-company, multi-currency, complete accounting package

GENIUS ERP IS WITH YOU EVERY STEP OF THE WAY.

JOB

CRM

- ▶ Coordinate your sales team with simplified pipeline management, coordinate communications, track leads and opportunities from desktop or mobile

QUOTE/ESTIMATE

- ▶ Streamline your quoting and estimating process by quickly generating an accurate quote based on price/cost and BOM
- ▶ Guide your salesforce with rules-based Genius Sales Configurator

QUOTE TO JOB

- ▶ Move from quote to sales order with a single click
- ▶ Generate jobs and seamlessly launch the MRP to drive material, work-centers and labor demand

CAD2BOM

With one click CAD2BOM turns Solidworks or Inventor models into a fully itemized, complex BOM

ENGINEER TO MANUFACTURING - ETM

- ▶ Alleviate design bottlenecks with fully incorporated engineering
- ▶ Engineer from scratch or use historical data to design custom products and anticipate resource requirements with greater accuracy

PRODUCTION SCHEDULING - MRP

- ▶ Align your whole company and manage the priorities that drive your organization
- ▶ Genius ERP schedules work centers, personnel, required parts and tools based on your BOM and actual workload and capacity
- ▶ Monitor and improve work center performance and availability using integrated real-time data

PRODUCTION

- ▶ Maximize throughput and deliver on time with Genius ERP by managing all aspects of each job and balancing shifting priorities with a fully integrated and connected system
- ▶ Use real-time data to track job progress, identify production bottlenecks and measure system performance

PURCHASING

- ▶ Increase the negotiating power of your purchasing department by aggregating POs
- ▶ Genius ERP gives you the tools to challenge your vendors factoring on-time delivery, quality and cost
- ▶ One-click PO creation

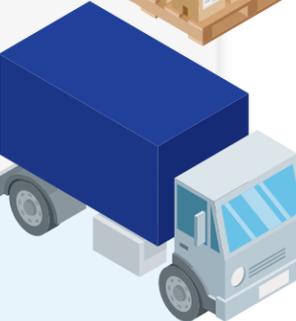

JOB COSTING

- ▶ Increase profitability by accurately measuring job costs, comparing to your initial estimate to target profit/loss centers
- ▶ Real-time job costing allows you to improve on the fly and better predict your profit

SHIPPING/INVOICING

- ▶ Coordinate distribution from a single system to ensure error-free shipping
- ▶ Generate pick list, prepare shipping memos, bills of lading and commercial invoices

GROW YOUR BUSINESS WITH THE ERP BUILT BY ENGINEERS AND MANUFACTURING INDUSTRY EXPERTS EXCLUSIVELY FOR CUSTOM MANUFACTURERS

CLOUD OR ON-PREMISE
the choice is yours

Whether you call it MTO, CTO or ETO, if you are a high-mix, low-volume custom manufacturer Genius ERP was built specifically to help you increase your throughput and grow your business.

- ▶ Increase throughput.
- ▶ Improve efficiency.
- ▶ Reduce costs.
- ▶ Grow your Business
