

3-14. Pig Latin translator

Pig Latin is a simple language game where words are changed according to simple rules. Write a program that prompts the user to enter a word. Your program should print the corresponding Pig Latin word based on these two rules:

- a) If the word starts with a consonant, move it to the end of the word and add "ay" (e.g., happy - appyhay)
- b) If the word starts with a vowel, just add "yay" to the end of the word.
