# Secure Score

Identifying areas to improve security posture through active reporting and best practice baselines

## What is Secure Score?

Microsoft Secure Score is a measurement of an organisation's security posture; By following the Secure Score measurement recommendations, your organisation can help protect from cyber incident threats, all from a centralised dashboard with the Microsoft 365 Security Centre.

Gain access to robust visualisations of metrics and trends, integration with other Microsoft products such as Defender and Azure Active Directory, score comparison with similar organisations, and much more.

## Our Approach

Working with IT, Security and Information Governance, we will host a workshop over a half-day to run through the Microsoft Security toolkit and step-through Microsoft Secure Score with a focus on Identity, Office 365 and Devices. Building out a Good, Better, Best posture roadmap for any organisation wanting to increase their defence in depth strategy or move to zero trust security patterns.

### Assess

Assess the state of your security posture across identity, devices, information, apps, and infrastructure.

### Identify

Evaluate each recommendation using embedded guidance to determine which vectors of attack are a priority

### Report

Reports to track and maintain progress, identify regressions, and report to leaderships teams.

### Drive

Use integrated workflow capabilities to help determine potential user impact.

## Core Deliverables

- Workshop over a half-day with IT, Security or Information Governance
- Mapping of Good, Better, Best Objectives
- Run-through of Microsoft Security Suite
- Identify areas to remediate based on Secure Score Roadmap
